

Stefan Felsner

Geometric Graphs and Arrangements

Some Chapters from Combinatorial Geometry

Bibliographic information published by Die Deutsche Bibliothek
Die Deutsche Bibliothek lists this publication in the Deutsche Nationalbibliografie;
detailed bibliographic data is available in the Internet at <<http://dnb.ddb.de>>.

Contents

Preface	V
Contents	IX
1 Geometric Graphs: Turán Problems	1
1.1 What is a Geometric Graph?	1
1.2 Fundamental Concepts in Graph Theory	2
1.3 Planar Graphs	3
1.4 Outerplanar Graphs and Convex Geometric Graphs	6
1.5 Geometric Graphs without $(k + 1)$ -Pairwise Disjoint Edges	7
1.6 Geometric Graphs without Parallel Edges	10
1.7 Notes and References	13
2 Schnyder Woods or How to Draw a Planar Graph?	17
2.1 Schnyder Labelings and Woods	17
2.2 Regions and Coordinates	23
2.3 Geodesic Embeddings of Planar Graphs	24
2.4 Dual Schnyder Woods	28
2.5 Order Dimension of 3-Polytopes	30
2.6 Existence of Schnyder Labelings	35
2.7 Notes and References	37
3 Topological Graphs: Crossing Lemma and Applications	43
3.1 Crossing Numbers	43
3.2 Bounds for the Crossing Number	44
3.3 Improving the Crossing Constant	46
3.4 Crossing Numbers and Incidence Problems	48
3.5 Notes and References	50
4 k-Sets and k-Facets	53
4.1 k -Sets in the Plane	53
4.2 Beyond the Plane	58
4.3 The Rectilinear Crossing Number of K_n	61
4.4 Notes and References	66
5 Combinatorial Problems for Sets of Points and Lines	69
5.1 Arrangements, Planes, Duality	69
5.2 Sylvester's Problem	72
5.3 How many Lines are Spanned by n Points?	76
5.4 Triangles in Arrangements	78
5.5 Notes and References	84

6	Combinatorial Representations of Arrangements of Pseudolines	87
6.1	Marked Arrangements and Sweeps	87
6.2	Allowable Sequences and Wiring Diagrams	91
6.3	Local Sequences	95
6.4	Zonotopal Tilings	100
6.5	Triangle Signs	105
6.6	Signotopes and their Orders	108
6.7	Notes and References	111
7	Triangulations and Flips	114
7.1	Degrees in the Flip-Graph	114
7.2	Delaunay Triangulations	117
7.3	Regular Triangulations and Secondary Polytopes	120
7.4	The Associahedron and Catalan families	123
7.5	The Diameter of \mathcal{G}_n and Hyperbolic Geometry	125
7.6	Notes and References	129
8	Rigidity and Pseudotriangulations	131
8.1	Rigidity, Motion and Stress	131
8.2	Pseudotriangles and Pseudotriangulations	139
8.3	Expansive Motions	143
8.4	The Polyhedron of of Pointed Pseudotriangulations	144
8.5	Expansive Motions and Straightening Linkages	148
8.6	Notes and References	149
	Bibliography	151
	Index	165
