Contents

| | |
|---|----|
| Preface | xi |
| Enumeration of items and cross references | xv |
| Chapter 1. Algebraic Geometry | 1 |
| 1. Introduction | 1 |
| 2. Commutative algebra | 3 |
| 2.1. Ring and field extensions | 3 |
| 2.2. Hilbert's Nullstellensatz | 7 |
| 2.3. Separability | 9 |
| 2.4. Faithfully flat ring extensions | 12 |
| 2.5. Regular local rings | 13 |
| 3. Algebraic subsets of the affine space | 14 |
| 3.1. Basic definitions | 14 |
| 3.2. The Zariski topology | 17 |
| 3.3. Polynomial maps. Morphisms | 19 |
| 4. Algebraic varieties | 23 |
| 4.1. Sheaves on topological spaces | 23 |
| 4.2. The maximal spectrum | 26 |
| 4.3. Affine algebraic varieties | 27 |
| 4.4. Algebraic varieties | 34 |
| 4.5. Morphisms of algebraic varieties | 45 |
| 4.6. Complete varieties | 51 |
| 4.7. Singular points and normal varieties | 53 |
| 5. Deeper results on morphisms | 56 |
| 6. Exercises | 64 |
| Chapter 2. Lie algebras | 73 |
| 1. Introduction | 73 |
| 2. Definitions and basic concepts | 74 |
| 3. The theorems of F. Engel and S. Lie | 78 |
| 4. Semisimple Lie algebras | 84 |

| | |
|--|-----|
| 5. Cohomology of Lie algebras | 89 |
| 6. The theorems of H. Weyl and F. Levi | 97 |
| 7. p -Lie algebras | 99 |
| 8. Exercises | 101 |
| Chapter 3. Algebraic groups: basic definitions | 107 |
| 1. Introduction | 107 |
| 2. Definitions and basic concepts | 108 |
| 3. Subgroups and homomorphisms | 114 |
| 4. Actions of affine groups on algebraic varieties | 116 |
| 5. Subgroups and semidirect products | 121 |
| 6. Exercises | 126 |
| Chapter 4. Algebraic groups: Lie algebras and representations | 131 |
| 1. Introduction | 131 |
| 2. Hopf algebras and algebraic groups | 132 |
| 3. Rational G -modules | 139 |
| 4. Representations of SL_2 | 149 |
| 5. Characters and semi-invariants | 151 |
| 6. The Lie algebra associated to an affine algebraic group | 154 |
| 7. Explicit computations | 157 |
| 8. Exercises | 165 |
| Chapter 5. Algebraic groups: Jordan decomposition and applications | 173 |
| 1. Introduction | 173 |
| 2. The Jordan decomposition of a single operator | 174 |
| 3. The Jordan decomposition of an algebra homomorphism and of a derivation | 179 |
| 4. Jordan decomposition for coalgebras | 181 |
| 5. Jordan decomposition for an affine algebraic group | 187 |
| 6. Unipotency and semisimplicity | 191 |
| 7. The solvable and the unipotent radical | 198 |
| 8. Structure of solvable groups | 204 |
| 9. The classical groups | 210 |
| 9.1. The general linear group GL_n | 210 |

| | |
|---|---------|
| 9.2. The special linear group SL_n (case A) | 211 |
| 9.3. The projective general linear group $PGL_n(\mathbb{k})$ (case A) | 212 |
| 9.4. The special orthogonal group SO_n (cases B,D) | 213 |
| 9.5. The symplectic group Sp_n , $n = 2m$ (case C) | 214 |
| 10. Exercises | 215 |
| Chapter 6. Actions of algebraic groups | 219 |
| 1. Introduction | 219 |
| 2. Actions: examples and first properties | 220 |
| 3. Basic facts about the geometry of the orbits | 224 |
| 4. Categorical and geometric quotients | 227 |
| 5. The subalgebra of invariants | 238 |
| 6. Induction and restriction of representations | 242 |
| 7. Exercises | 248 |
| Chapter 7. Homogeneous spaces | 253 |
| 1. Introduction | 253 |
| 2. Embedding H -modules inside G -modules | 254 |
| 3. Definition of subgroups in terms of semi-invariants | 258 |
| 4. The coset space G/H as a geometric quotient | 266 |
| 5. Quotients by normal subgroups | 268 |
| 6. Applications and examples | 271 |
| 7. Exercises | 276 |
| Chapter 8. Algebraic groups and Lie algebras in characteristic zero | 279 |
| 1. Introduction | 279 |
| 2. Correspondence between subgroups and subalgebras | 281 |
| 3. Algebraic Lie algebras | 287 |
| 4. Exercises | 291 |
| Chapter 9. Reductivity | 295 |
| 1. Introduction | 295 |
| 2. Linear and geometric reductivity | 297 |
| 3. Examples of linearly and geometrically reductive groups | 308 |
| 4. Reductivity and the structure of the group | 314 |

| | |
|---|-----|
| 5. Reductive groups are linearly reductive in characteristic zero | 318 |
| 6. Exercises | 320 |
| Chapter 10. Observable subgroups of affine algebraic groups | 323 |
| 1. Introduction | 323 |
| 2. Basic definitions | 324 |
| 3. Induction and observability | 328 |
| 4. Split and strong observability | 330 |
| 5. The geometric characterization of observability | 339 |
| 6. Exercises | 341 |
| Chapter 11. Affine homogeneous spaces | 345 |
| 1. Introduction | 345 |
| 2. Geometric reductivity and observability | 346 |
| 3. Exact subgroups | 347 |
| 4. From quasi-affine to affine homogeneous spaces | 348 |
| 5. Exactness, Reynolds operators, total integrals | 350 |
| 6. Affine homogeneous spaces and exactness | 353 |
| 7. Affine homogeneous spaces and reductivity | 356 |
| 8. Exactness and integrals for unipotent groups | 357 |
| 9. Exercises | 360 |
| Chapter 12. Hilbert's 14 th problem | 363 |
| 1. Introduction | 363 |
| 2. A counterexample to Hilbert's 14 th problem | 366 |
| 3. Reductive groups and finite generation of invariants | 375 |
| 4. V. Popov's converse to Nagata's theorem | 379 |
| 5. Partial positive answers to Hilbert's 14 th problem | 381 |
| 6. Geometric characterization of Grosshans pairs | 387 |
| 7. Exercises | 389 |
| Chapter 13. Quotients | 393 |
| 1. Introduction | 393 |
| 2. Actions by reductive groups: the categorical quotient | 394 |
| 3. Actions by reductive groups: the geometric quotient | 400 |

| | |
|--|-----|
| 4. Canonical forms of matrices: a geometric perspective | 404 |
| 5. Rosenlicht's theorem | 407 |
| 6. Further results on invariants of finite groups | 410 |
| 6.1. Invariants of graded algebras | 411 |
| 6.2. Polynomial subalgebras of polynomial algebras | 413 |
| 6.3. The case of a group generated by reflections | 417 |
| 6.4. The degree of the fundamental invariants for a finite group | 419 |
| 7. Exercises | 420 |
| APPENDIX. Basic definitions and results | 423 |
| 1. Introduction | 423 |
| 2. Notations | 423 |
| 2.1. Category theory | 423 |
| 2.2. General topology | 424 |
| 2.3. Linear algebra | 424 |
| 2.4. Group theory | 425 |
| 3. Rings and modules | 427 |
| 4. Representations | 431 |
| Bibliography | 433 |
| Glossary of Notations | 441 |
| Author Index | 445 |
| Index | 447 |
