Contents

Part I Measure Theory and L^p Spaces

1	Measures	3
1.1	Measures and Integration	3
1.1.1	Measures and Outer Measures	3
1.1.2	Radon and Borel Measures and Outer Measures	22
1.1.3	Measurable Functions and Lebesgue Integration	37
1.1.4	Comparison Between Measures	55
1.1.5	Product Spaces	77
1.1.6	Projection of Measurable Sets	83
1.2	Covering Theorems and Differentiation of Measures in \mathbb{R}^N	90
1.2.1	Covering Theorems in \mathbb{R}^N	90
1.2.2	Differentiation Between Radon Measures in \mathbb{R}^N	103
1.3	Spaces of Measures	113
1.3.1	Signed Measures	113
1.3.2	Signed Finitely Additive Measures	119
1.3.3	Spaces of Measures as Dual Spaces	123
1.3.4	Weak Star Convergence of Measures	129
2	L^p Spaces	139
2.1	Abstract Setting	139
2.1.1	Definition and Main Properties	139
2.1.2	Strong Convergence in L^p	148
2.1.3	Dual Spaces	156
2.1.4	Weak Convergence in L^p	171
2.1.5	Biting Convergence	184
2.2	Euclidean Setting	190
2.2.1	Approximation by Regular Functions	190
2.2.2	Weak Convergence in L^p	198
2.2.3	Maximal Functions	208
2.3	L^p Spaces on Banach Spaces	218

Part II The Direct Method and Lower Semicontinuity

3	The Direct Method and Lower Semicontinuity	231
3.1	Lower Semicontinuity	231
3.2	The Direct Method	245
4	Convex Analysis	247
4.1	Convex Sets	247
4.2	Separating Theorems	254
4.3	Convex Functions	258
4.4	Lipschitz Continuity in Normed Spaces	262
4.5	Regularity of Convex Functions	266
4.6	Recession Function	288
4.7	Approximation of Convex Functions	293
4.8	Convex Envelopes	300
4.9	Star-Shaped Sets	318

Part III Functionals Defined on L^p

5	Integrands $f = f(z)$	325
5.1	Well-Posedness	326
5.2	Sequential Lower Semicontinuity	331
5.2.1	Strong Convergence in L^p	331
5.2.2	Weak Convergence and Weak Star Convergence in L^p	334
5.2.3	Weak Star Convergence in the Sense of Measures	340
5.2.4	Weak Star Convergence in $(C_b(\bar{E}; \mathbb{R}^m))'$	350
5.3	Integral Representation	354
5.4	Relaxation	364
5.4.1	Weak Convergence and Weak Star Convergence in L^p , $1 \leq p \leq \infty$	365
5.4.2	Weak Star Convergence in the Sense of Measures	369
5.5	Minimization	373
6	Integrands $f = f(x, z)$	379
6.1	Multifunctions	380
6.1.1	Measurable Selections	380
6.1.2	Continuous Selections	395
6.2	Integrands	401
6.2.1	Equivalent Integrands	401
6.2.2	Normal and Carathéodory Integrands	404
6.2.3	Convex Integrands	413
6.3	Well-Posedness	428
6.3.1	Well-Posedness, $1 \leq p < \infty$	428
6.3.2	Well-Posedness, $p = \infty$	435

6.4	Sequential Lower Semicontinuity	436
6.4.1	Strong Convergence in L^p , $1 \leq p < \infty$	436
6.4.2	Strong Convergence in L^∞	442
6.4.3	Weak Convergence in L^p , $1 \leq p < \infty$	445
6.4.4	Weak Star Convergence in L^∞	448
6.4.5	Weak Star Convergence in the Sense of Measures	449
6.5	Integral Representation in L^p	464
6.6	Relaxation in L^p	473
6.6.1	Weak Convergence and Weak Star Convergence in L^p , $1 \leq p \leq \infty$	473
6.6.2	Weak Star Convergence in the Sense of Measures in L^1	478
7	Integrands $f = f(x, u, z)$	485
7.1	Convex Integrands	485
7.2	Well-Posedness	489
7.3	Sequential Lower Semicontinuity	491
7.3.1	Strong–Strong Convergence	491
7.3.2	Strong–Weak Convergence $1 \leq p, q < \infty$	492
7.4	Relaxation	511
8	Young Measures	517
8.1	The Fundamental Theorem for Young Measures	518
8.2	Characterization of Young Measures	532
8.2.1	The Homogeneous Case	533
8.2.2	The Inhomogeneous Case	538
8.3	Relaxation	540

Part IV Appendix

A	Functional Analysis and Set Theory	549
A.1	Some Results from Functional Analysis	549
A.1.1	Topological Spaces	549
A.1.2	Metric Spaces	552
A.1.3	Topological Vector Spaces	554
A.1.4	Normed Spaces	558
A.1.5	Weak Topologies	560
A.1.6	Dual Pairs	563
A.1.7	Hilbert Spaces	566
A.2	Wellorderings, Ordinals, and Cardinals	567
B	Notes and Open Problems	573
	Notation and List of Symbols	581
	Acknowledgments	585

References	587
Index	595
