

## Contents

<i>Preface</i>	<i>page</i>	ix
<i>List of abbreviations</i>		xi
1 Introduction		1
1.1 Historical remarks		1
1.2 Linear Physics		3
1.3 Ordered exponentials		13
Notes		16
2 Elementary functional methods		17
2.1 Functional differentiation		17
2.2 Linear translation		18
2.3 Quadratic (Gaussian) translation		20
2.4 Functional integration		23
2.5 Examples drawn from quantum field theory		27
2.6 Cluster decomposition		30
Notes		32
3 Schwinger–Fradkin methods		33
3.1 Proper-time representations of Schwinger and Fradkin		33
3.2 Fradkin representations for QED and QCD		37
3.3 Gauge structure in QED and QCD		40
3.4 Soluble examples: quadratic forms and perturbative approximations		43
3.5 Pair production in generalized electric fields		45
Notes		50
4 Lasers and crossed lasers		51
4.1 Classical charged-particle propagation in a laser (epw) field		51
4.2 The “scalar” laser solution for $G_c[A]$		54

Cambridge University Press

052144862X - Green's Functions and Ordered Exponentials

H. M. Fried

Table of Contents

[More information](#)

viii	<i>Contents</i>	
4.3	The QED laser solutions for $G_c[A]$ and $L[A]$	56
4.4	Pair production via crossed lasers	62
	Notes	72
5	Special variants of the Fradkin representation	75
5.1	Exact representations for scalar interactions	75
5.2	Finite-quadrature approximations	82
5.3	Exact and approximate vectorial interactions	87
5.4	The Stojkov variation	90
	Notes	92
6	Quantum chaos and vectorial interactions	93
6.1	First-quantization chaos	93
6.2	Chaos suppression in second quantization	98
6.3	Fluctuation-induced chaos suppression	101
	Notes	106
7	Infrared approximations	107
7.1	The Bloch–Nordsieck approximation	108
7.2	IR damping at large momentum transfers	110
7.3	Eikonal scattering amplitudes in particle physics	114
7.4	IR approximations and rescaling corrections to non-linear ODEs	119
	Notes	123
8	Models of high-energy, non-Abelian scattering	125
8.1	An Abelian separation	126
8.2	The quasi-Abelian limit	128
8.3	Loop, ladder and crossed-ladder approximations	133
8.4	Summing all the eikonal graphs	142
	Notes	147
9	Unitary ordered exponentials	149
9.1	Algebraic and differential structure	149
9.2	The $SU(2)$ adiabatic limit	150
9.3	The stochastic limit	154
9.4	Functional integration over the stochastic limit	163
	Notes	167
	<i>Index</i>	168
