

Representations of Finite-Dimensional Algebras

P. Gabriel, A.V. Roiter

Contents

Foreword	2
1. Matrix Problems	4
2. Algebras, Modules and Categories	15
3. Radical, Decomposition, Aggregates	25
4. Finitely Spaced Modules	33
5. Finitely Represented Posets	46
6. Roots	56
7. Representations of Quivers	62
8. Spectroids, Quivers, Coherence	73
9. Almost Split Sequences	87
10. Postprojective Components	101
11. Representations of Tame Quivers	120
12. Derivation and Tilting (by B. Keller)	130
13. Multiplicative Bases	142
14. Finitely Represented Algebras	156
Bibliography	166
Subject Index	173
List of Symbols	176
