# CONTENTS

<b>PREFACE</b>	<b>v</b>
<b>LIST OF SYMBOLS</b>	<b>xiii</b>
<b>1. INTRODUCTION</b>	<b>1</b>
1.1. The concept of an “interface”	2
1.2. The concept of an “interfacial layer”	3
1.3. Presentation of the volume	4
<b>2. THERMODYNAMICS AND KINEMATICS OF INTERFACES</b>	<b>7</b>
2.1. Definition of surfaces	8
2.2. Interfacial quantities	10
2.3. Thermodynamic relations	12
2.3.1. The bulk	13
2.3.2. The interface	15
2.3.3. Thermodynamic equilibrium between two phases at rest	17
2.3.4. Surface tension out of equilibrium	20
2.4. Velocities and deformation rates of the interface	21
2.4.1. Material velocities in the bulk	21
2.4.2. Interfacial velocities in intrinsic description	21
2.4.3. Velocities in orthogonal curvilinear coordinates	23
2.4.4. Strain rates	26
2.4.5. Transport theorem for a curvilinear integral	27
2.4.6. Transport theorem for a surface integral	27
2.4.7. Divergence theorem on a surface	28
2.4.8. Interfacial fluxes	29
2.5. Examples	30
2.5.1. Effect of curvature on surface integrals	30
2.5.2. Parallel curves	32

2.5.3. Parallel surfaces	33
2.5.4. Effect of curvature on lateral surface integrals in the case of parallel surfaces	34
2.5.5. Effect of curvature on equilibrium surface tension	36
2.5.6. Determination of the mean normal curvature	38
2.5.7. Deformation along a surface	39
2.5.8. Stretch of a moving cylinder	39
2.5.9. Stretch of a planar flame	41
<b>3. INTERFACE BALANCE LAWS</b>	<b>43</b>
3.1. General interface balance law	44
3.1.1. Balance law for the three-dimensional continuum	44
3.1.2. First integration method of the local balance laws for the three-dimensional continuum	45
3.1.3. Second integration method of the balance laws for the three-dimensional continuum	51
3.1.4. Some comments	54
3.2. Interface balance laws for species, mass, momentum and energy	56
3.2.1. Interface balance laws for species	56
3.2.2. Interface balance law for mass	57
3.2.3. Momentum interface balance law	58
3.2.4. Energy interface balance law	60
3.3. Interfacial entropy production	62
3.3.1. Interfacial entropy inequality	62
3.3.2. Interface Clausius-Duhem inequality	65
3.3.3. Balance laws for an interface inside one component fluids	68
3.3.4. A remark for the interfaces without mass	69
<b>4. CONSTITUTIVE RELATIONS DEDUCED FROM LINEAR IRREVERSIBLE THERMODYNAMICS FOR THE TWO-DIMENSIONAL INTERFACES</b>	<b>73</b>
4.1. Analysis of the surface entropy production and possible coupling	73
4.2. Capillarity at equilibrium	75
4.3. Newtonian interface and surface viscosities	78
4.3.1. Bénard-Marangoni effect	78
4.3.2. Surface viscosities	78
4.4. Surface heat transfer	79
4.5. Problems related to evaporation / condensation	81
4.5.1. Plane interface case	81
4.5.2. Curvature effect	84
4.6. Surface chemical reactions	85
4.7 Interfaces without mass	87

<b>5. CLASSICAL THREE-DIMENSIONAL CONSTITUTIVE RELATIONS DEDUCED FROM LINEAR IRREVERSIBLE THERMODYNAMICS AND THEIR CONSEQUENCES FOR INTERFACES</b>	<b>91</b>
5.1. Constitutive relations of three-dimensional classical fluid mixtures	92
5.2. The case of premixed flames with high activation energy	95
5.2.1. The classical theory of planar adiabatic premixed flames	96
5.2.2. Curved premixed flames with high activation energy for Lewis number near unity	101
5.3. The case of shock waves and relaxation zones behind shock waves	108
5.3.1. The gaseous shock wave as an interface	108
5.3.2. Shock wave in a dusty gas	114
<b>6. SECOND GRADIENT THEORY APPLIED TO INTERFACIAL MEDIUM</b>	<b>125</b>
6.1. Description of a fluid with internal capillarity	126
6.1.1. Balance law for the mass	126
6.1.2. Virtual power principle	126
6.1.3. Boundary conditions on a wall	129
6.1.4. Balance energy law	132
6.1.5. Entropy inequality and Clausius-Duhem inequality	133
6.1.6. Expression for the specific internal energy	133
6.2. A set of equations for a fluid with capillarity	135
6.2.1. Constitutive laws	135
6.2.2. Equation system for the description of a fluid with capillarity	137
6.3. Asymptotic modelization of an interface without mass	138
6.3.1. Order of magnitude analysis	140
6.3.2. Analysis of the interface balance laws	141
6.4. An expression for the surface tension	144
6.5. Description of a mixture of fluids with internal capillarity	146
6.5.1. Balance law for the mass of the N species	146
6.5.2. Virtual power principle for the mixture	147
6.5.3. Balance internal energy	149
6.5.4. Entropy inequality and Clausius-Duhem inequality	150
6.5.5. Expression for the specific internal energy	150
6.5.6. A set of equations for a mixture of fluids with capillarity	153
<b>7. TYPICAL PROBLEMS INVOLVING SURFACE TENSION AND OTHER SURFACE PROPERTIES</b>	<b>157</b>
7.1. The growth of a bubble	158
7.2. An interface with a surface viscosity	163
7.3. An interface with a variable surface tension	166
7.4. Marangoni instability	170

7.4.1. Planar surface	171
7.4.2. Free surface	175
7.5. Vapor recoil	177
7.5.1. The Palmer analysis of the Hickman instability	177
7.5.2. The case of a mixture	183
7.5.3. Boiling crisis	186
7.6. Diffusive interfaces	190
7.6.1. Rayleigh-Taylor and Kelvin-Helmholtz instabilities	190
7.6.2. Linearized theory of interfacial layer instability between two heavy miscible fluids	195
7.6.3. Interfacial layer instability in a pure heated supercritical fluid	199
7.6.4. Linearized study of shear layers	200
<b>A.1. TENSORIAL NOTATIONS</b>	<b>205</b>
<b>A.2. GEOMETRY OF INTERFACES AND INTERFACIAL LAYERS IN ORTHOGONAL CURVILINEAR COORDINATES</b>	<b>209</b>
A2.1. Definition of the surfaces	209
A2.2. Curvilinear coordinates	210
A2.3. Curl of a vector field	211
A2.4. Divergence of a vector field	212
A2.5. Gradient of a scalar field	213
A2.6. Laplacian of a scalar field	213
A2.7. Differentiation of curvilinear basis	213
A2.8. Divergence of a second order tensor field $\vec{\vec{P}}$	214
A2.9. Gradient of a vector	215
A2.10. Projection operators	215
A2.11. Surface gradients of a scalar field	216
A2.12. Curvature vector of a curve $C_i$	216
A2.13. Definitions of normal and tangential divergences of a vector field	217
A2.14. Surface stretch per unit length	217
A2.15. Mean normal curvature of a surface	218
A2.16. Decomposition of the divergence of a vector field	219
A2.17. Decomposition of the Laplacian of a scalar field	220
A2.18. Decomposition of the divergence of a second order tensor field	221
A2.19. Parallel divergence of the product $\vec{\nabla} \cdot \vec{\vec{P}}$ for a particular class of tensors $\vec{\vec{P}}$	223
A2.20. Intrinsic definition of a surface	223
A2.21. Comparison between the two descriptions	224
A2.22. Family of parallel surfaces	226
A2.23. Variation of the parallel divergence of a vector across an interfacial layer	228

<b>A.3. KINEMATICS OF THE INTERFACE</b>	<b>231</b>
A3.1. Velocities in intrinsic description	231
A3.2. Velocities in orthogonal curvilinear coordinates	232
A3.3. Strain rates	233
A3.4. Parallel surfaces	235
A3.5. Stretching rate of a surface	235
A3.6. Stretch variation across interfacial layer	236
