Calculus of Variations

I. M. Gelfand
S. V. Fomin

Translated and Edited by
Richard A. Silverman

DOVER PUBLICATIONS, INC.
Mineola, New York

CONTENTS

1 ELEMENTS OF THE THEORY Page 1. 1: Functionals. Some Simple Variational Problems, 1. 2: Function Spaces, 4. 3: The Variation of a Functional. A Necessary Condition for an Extremum, 8. 4: The Simplest Variational Problem. Euler's Equation, 14. 5: The Case of Several Variables, 22. 6: A Simple Variable End Point Problem, 25. 7: The Variational Derivative, 27. 8: Invariance of Euler's Equation, 29. Problems, 31.

2 FURTHER GENERALIZATIONS Page 34. 9: The Fixed End Point Problem for n Unknown Functions, 34. 10. Variational Problems in Parametric Form, 38. 11: Functionals Depending on Higher-Order Derivatives, 40. 12: Variational Problems with Subsidiary Conditions, 42. Problems, 50.

3 THE GENERAL VARIATION OF A FUNCTIONAL Page 54. 13: Derivation of the Basic Formula, 54. 14: End Points Lying on Two Given Curves or Surfaces, 59. 15: Broken Extremals. The Weierstrass-Erdmann Conditions, 61. Problems, 63.

4 THE CANONICAL FORM OF THE EULER EQUATIONS AND RELATED TOPICS Page 67. 16: The Canonical Form of the Euler Equations, 67. 17: First Integrals of the Euler Equations, 70. 18: The Legendre Transformation, 71. 19: Canonical Transformations, 77. 20: Noether's Theorem, 79. 21: The Principle of Least Action, 83. 22: Conservation Laws, 85. 23: The Hamilton-Jacobi Equation. Jacobi's Theorem, 88. Problems, 94.

5 THE SECOND VARIATION. SUFFICIENT CONDITIONS FOR A WEAK EXTREMUM Page 97. 24: Quadratic Functionals. The Second Variation of a Functional, 97. 25: The Formula for the Second Variation. Legendre's Condition, 101. 26: Analysis of the Quadratic Functional $\int_a^b (Ph'^2 + Qh^2)\,dx$, 105. 27: Jacobi's Necessary Condition. More on Conjugate Points, 111. 28: Sufficient Conditions for a Weak Extremum, 115. 29: Generalization to n Unknown Functions, 117. 30: Connection Between Jacobi's Condition and the Theory of Quadratic Forms, 125. Problems, 129.

6 FIELDS. SUFFICIENT CONDITIONS FOR A STRONG EXTREMUM Page 131. 31: Consistent Boundary Conditions. General Definition of a Field, 131. 32: The Field of a Functional, 137. 33: Hilbert's Invariant Integral, 145. 34: The Weierstrass E-Function. Sufficient Conditions for a Strong Extremum, 146. Problems, 150.

7 VARIATIONAL PROBLEMS INVOLVING MULTIPLE INTEGRALS Page 152. 35: Variation of a Functional Defined on a Fixed Region, 152. 36: Variational Derivation of the Equations of Motion of Continuous Mechanical Systems, 154. 37: Variation of a Functional Defined on a Variable Region, 168. 38: Applications to Field Theory, 180. Problems, 190.

8 DIRECT METHODS IN THE CALCULUS OF VARIATIONS Page 192. 39: Minimizing Sequences, 193. 40: The Ritz Method and the Method of Finite Differences, 195. 41: The Sturm-Liouville Problem, 198. Problems, 206.

APPENDIX I PROPAGATION OF DISTURBANCES AND THE CANONICAL EQUATIONS Page 208.

APPENDIX II VARIATIONAL METHODS IN PROBLEMS OF OPTIMAL CONTROL Page 218.
