Contents

Preface vii

List of symbols xv

1. Short historical notes on motor vehicles 1

   1.1 Mechanical vehicles 1
   1.2 Ancient world 2
   1.3 From the Renaissance to the industrial revolution 16
   1.4 Motor vehicles in XIX century 22
   1.5 The age of motor cars 29

2. Forces acting between road and wheel 33

   2.1 Structure of pneumatic tires 33
   2.2 Contact pressure and stiffness 35
   2.3 Rolling radius 38
   2.4 Rolling resistance 41
   2.5 Tractive and braking forces 52
   2.6 Cornering forces 62
   2.7 Interaction between longitudinal and side forces 76
   2.8 Dynamic behaviour of tires 83
   2.9 Experimental study of the characteristics of tires 87

3. Road vehicle aerodynamics 89

   3.1 General considerations 89

3.2 Aerodynamic field 98
3.3 Aerodynamic drag 105
3.4 Aerodynamic lift and pitching moment 120
3.5 Side force, rolling and yawing moments 125
3.6 Study of aerodynamic forces and moments 127

4. Longitudinal dynamics 133

4.1 Load distribution on the ground 133
4.2 Steady state motion on straight road 141
4.3 Vehicle take-off from rest 166
4.4 Acceleration 171
4.5 Fuel consumption in actual driving conditions 178
4.6 Electric and hybrid vehicles 182
4.7 Braking on straight road 187
4.8 An outline on standards for braking systems 200

5. Handling of a rigid vehicle 205

5.1 Trajectory control in road vehicles 205
5.2 Low-speed or kinematic steering 206
5.3 Simplified model: Ideal steering 216
5.4 High-speed cornering of a rigid vehicle 222
5.5 Linearized handling model 230
5.6 Linearized steady state directional behaviour 239
5.7 Stability of the vehicle 256
5.8 Unstationary motion 268
5.9 Vehicles with two steering axles (4WS) 273
5.10 VDC 276
5.11 Articulated vehicles 278
5.12 Linearized model for articulated vehicles 286
5.13 Multibody articulated vehicles 300
5.14 Limits of linearized models 307
5.15 Semilinearized models 308
5.16 Vehicle-driver interaction 313

6. Motor vehicle on elastic suspensions 325

6.1 Types of suspensions 328
6.2 Generalized coordinates for rotations 348
6.3 Model for an insulated vehicle 351

6.4 Linearized model for an insulated vehicle 354
6.5 Uncoupling between handling and ride 369
6.6 Handling of a vehicle on elastic suspensions 371
6.7 Ride comfort 375
6.8 Quarter-car models 378
6.9 Bounce and pitch motions 394
6.10 Roll motions 401
6.11 Models of deformable vehicles 403
6.12 Gyroscopic moments and other second-order effects 410
6.13 Excitation sources 413
6.14 Concluding remarks on ride comfort 423
6.15 Simple model for the handling of motorcycles 425

7. Road accidents 445

7.1 Vehicle collision: Impulsive model 446
7.2 Vehicle collision: Advanced model 462
7.3 Motion after the collision 478
7.4 Rollover 487
7.5 Motion of transported objects during the impact 497

Appendix A 507

A.1 Example 1: small front-wheel drive car 507
A.2 Example 2: large front-wheel drive saloon car 509
A.3 Example 3: large rear-wheel drive sports car 511
A.4 Example 4: articulated truck 513
A.5 Example 5: racing motorcycle 515
