Preface	xi
The one dimensional case	xi
Mappings and measures on $\mathbb{R}^n$	xii
Fourier series	xiii
<b>Part 1. The One Dimensional Case</b>	<b>1</b>
Chapter 1. Subsets of $\mathbb{R}$	3
1.1. Equivalence classes	3
1.2. Lebesgue equivalence of sets	4
1.3. Density topology	5
1.4. The Zahorski classes	10
Chapter 2. Baire Class 1	13
2.1. Characterization	13
2.2. Absolutely measurable functions	15
2.3. Example	19
Chapter 3. Differentiability Classes	21
3.1. Continuous functions of bounded variation	21
3.2. Continuously differentiable functions	27
3.3. The class $C^n[0, 1]$	30
3.4. Remarks	38
Chapter 4. The Derivative Function	41
4.1. Properties of derivatives	41
4.2. Characterization of the derivative	45
4.3. Proof of Maximoff's theorem	47
4.4. Approximate derivatives	53
4.5. Remarks	56
<b>Part 2. Mappings and Measures on <math>\mathbb{R}^n</math></b>	<b>59</b>
Chapter 5. Bi-Lipschitzian Homeomorphisms	61
5.1. Lebesgue measurability	61
5.2. Length of nonparametric curves	63
5.3. Nonparametric area	68
5.4. Invariance under self-homeomorphisms	71
5.5. Invariance of approximately continuous functions	72
5.6. Remarks	74

Chapter 6. Approximation by Homeomorphisms	77
6.1. Background	77
6.2. Approximations by homeomorphisms of one-to-one maps	78
6.3. Extensions of homeomorphisms	80
6.4. Measurable one-to-one maps	84
Chapter 7. Measures on $\mathbb{R}^n$	89
7.1. Preliminaries	89
7.2. The one variable case	91
7.3. Constructions of deformations	91
7.4. Deformation theorem	96
7.5. Remarks	97
Chapter 8. Blumberg's Theorem	99
8.1. Blumberg's theorem for metric spaces	99
8.2. Non-Blumberg Baire spaces	103
8.3. Homeomorphism analogues	104
<b>Part 3. Fourier Series</b>	<b>109</b>
Chapter 9. Improving the Behavior of Fourier Series	111
9.1. Preliminaries	111
9.2. Uniform convergence	117
9.3. Conjugate functions and the Pál-Bohr theorem	120
9.4. Absolute convergence	124
Chapter 10. Preservation of Convergence of Fourier Series	131
10.1. Tests for pointwise and uniform convergence	131
10.2. Fourier series of regulated functions	138
10.3. Uniform convergence of Fourier series	149
Chapter 11. Fourier Series of Integrable Functions	159
11.1. Absolutely measurable functions	159
11.2. Convergence of Fourier series after change of variable	164
11.3. Functions of generalized bounded variation	167
11.4. Preservation of the order of magnitude of Fourier coefficients	178
Appendix A. Supplementary Material	187
Sets, Functions and Measures	187
A.1. Baire, Borel and Lebesgue	187
A.2. Lipschitzian functions	189
A.3. Bounded variation	192
Approximate Continuity	195
A.4. Density topology	195
A.5. Approximately continuous maps into metric spaces	197
Hausdorff Measure and Packing	198
A.6. Hausdorff dimension	198
A.7. Hausdorff packing	199
Nonparametric Length and Area	203
A.8. Nonparametric length	203
A.9. Schwarz's example	203

A.10. Lebesgue's lower semicontinuous area	204
A.11. Distribution derivatives for one real variable	205
Bibliography	207
Index	213
