# Table of Contents

<b>Introduction</b> .....	1
<b>1. The Structure of Sifting Arguments</b> .....	7
1.1 The Sieves of Eratosthenes and Legendre .....	7
1.1.1 The Contribution of Eratosthenes .....	7
1.1.2 Legendre's Sieve .....	8
1.1.3 An Estimate for $\pi(X)$ .....	10
1.1.4 The Distribution of Primes .....	12
1.2 Examples of Sifting Situations .....	13
1.2.1 Notations .....	13
1.2.2 The Integers in an Interval $(Y - X, Y]$ .....	14
1.2.3 Numbers Given by Polynomial Expressions .....	15
1.2.4 Arithmetic Progressions .....	16
1.2.5 Sums of Two Squares .....	17
1.2.6 Polynomials with Prime Arguments .....	17
1.3 A General Formulation of a Sifting Situation .....	19
1.3.1 The Basic Formulation .....	19
1.3.2 Legendre's Sieve in a General Setting .....	23
1.3.3 A Generalised Formulation .....	25
1.3.4 A Further Generalisation .....	26
1.3.5 Sifting Density .....	27
1.3.6 The Sifting Limit $\beta(\kappa)$ .....	37
1.3.7 Composition of Sieves .....	37
1.4 Notes on Chapter 1 .....	39
<b>2. Selberg's Upper Bound Method</b> .....	41
2.1 The Sifting Apparatus .....	42
2.1.1 Selberg's Theorem .....	42
2.1.2 The Numbers $\lambda(d)$ .....	46
2.1.3 A Simple Application .....	49
2.2 General Estimates of $G(x)$ and $E(D, P)$ .....	50
2.2.1 An Estimate by Rankin's Device .....	51
2.2.2 Asymptotic Formulas .....	54
2.2.3 The Error Term .....	60

2.3 Applications .....	63
2.3.1 Arithmetic Progressions .....	63
2.3.2 Prime Twins and Goldbach's Problem .....	64
2.3.3 Polynomial Sequences .....	66
2.4 Notes on Chapter 2 .....	68
<b>3. Combinatorial Methods .....</b>	<b>71</b>
3.1 The Construction of Combinatorial Sieves .....	72
3.1.1 Preliminary Discussion of Brun's Ideas .....	72
3.1.2 Fundamental Inequalities and Identities .....	73
3.1.3 Buchstab's Identity .....	77
3.1.4 The Combinatorial Sieve Lemma .....	78
3.2 Brun's Pure Sieve .....	79
3.2.1 Inequalities and Identities .....	80
3.2.2 The "Pure Sieve" Theorem .....	81
3.2.3 A Corollary .....	83
3.2.4 Prime Twins .....	84
3.3 A Modern Edition of Brun's Sieve .....	85
3.3.1 Rosser's Choice of $\chi$ .....	86
3.3.2 A Technical Estimate .....	87
3.3.3 A Simplifying Approximation .....	88
3.3.4 A Combinatorial Sieve Theorem .....	89
3.3.5 Applications .....	94
3.4 Brun's Version of his Method .....	96
3.4.1 Brun's Choice of $\chi$ .....	96
3.4.2 The Estimations .....	97
3.4.3 The Result .....	98
3.5 Notes on Chapter 3 .....	100
<b>4. Rosser's Sieve .....</b>	<b>103</b>
4.1 Approximations by Continuous Functions .....	105
4.1.1 The Recurrence Relations .....	106
4.1.2 Partial Summation .....	108
4.1.3 The Leading Terms .....	110
4.2 The Functions $F$ and $f$ .....	113
4.2.1 The Difference-Differential Equations .....	113
4.2.2 The Adjoint Equation and the Inner Product .....	115
4.2.3 Solutions of the Adjoint Equation .....	117
4.2.4 Particular Values of $F(s)$ and $f(s)$ .....	124
4.2.5 Asymptotic Analysis as $\kappa \rightarrow \infty$ .....	129
4.3 The Convergence Problem .....	134
4.3.1 The Auxiliary Functions .....	135
4.3.2 Adjoints and Inner Products .....	137
4.3.3 The Case $\kappa \leq \frac{1}{2}$ .....	141

4.4	A Sieve Theorem Following Rosser .....	144
4.4.1	The Case $\kappa > \frac{1}{2}$ : a First Result .....	145
4.4.2	Theorem 1 when $\kappa \leq \frac{1}{2}$ .....	148
4.4.3	An Improved Version of Proposition 1 .....	150
4.4.4	A Two-Sided Estimate .....	156
4.5	Extremal Examples .....	158
4.5.1	The Linear Case .....	158
4.5.2	The Case $\kappa = \frac{1}{2}$ .....	164
4.6	Notes on Chapter 4 .....	167
<b>5.</b>	<b>The Sieve with Weights .....</b>	<b>173</b>
5.1	Simpler Weighting Devices .....	176
5.1.1	Logarithmic Weights .....	176
5.1.2	Modified Logarithmic Weights .....	179
5.1.3	Some Applications .....	184
5.2	More Elaborate Weighted Sieves .....	185
5.2.1	An Improved Weighting Device .....	186
5.2.2	Buchstab's Weights .....	188
5.3	A Weighted Sieve Following Rosser .....	193
5.3.1	Combining Sieving and Weighting .....	194
5.3.2	The Reduction Identities .....	202
5.3.3	An Identity for the Main Term .....	205
5.3.4	The Estimate for the Main Term .....	210
5.4	Notes on Chapter 5 .....	216
<b>6.</b>	<b>The Remainder Term in the Linear Sieve .....</b>	<b>223</b>
6.1	The Bilinear Nature of Rosser's Construction .....	226
6.1.1	The Factorisation of $\chi_D$ .....	227
6.1.2	Discretisations of Rosser's Sieve .....	229
6.1.3	Specification of Details .....	234
6.1.4	The Leading Contributions to the Main Term .....	238
6.1.5	Composition of Sieves .....	241
6.1.6	The Remainder Term .....	243
6.2	Sifting Short Intervals .....	245
6.2.1	The Smoothed Formulation .....	246
6.2.2	The Remainder Sums .....	250
6.2.3	Trigonometrical Sums .....	252
6.3	Notes on Chapter 6 .....	256
<b>7.</b>	<b>Lower Bound Sieves when <math>\kappa &gt; 1</math> .....</b>	<b>259</b>
7.1	An Extension of Selberg's Upper Bound .....	260
7.1.1	The Integral Equation and the Function $\sigma(s)$ .....	261
7.1.2	The Estimation of $G_z(s)$ .....	265

XII      Table of Contents

7.2	A Lower Bound Sieve via Buchstab's Identity .....	270
7.2.1	Buchstab's Iterations .....	271
7.2.2	The Buchstab Transform of the $\lambda^2$ Method .....	273
7.2.3	The Sifting Limit as $\kappa \rightarrow \infty$ .....	277
7.3	Selberg's $\Lambda^2 \Lambda^-$ Method .....	285
7.3.1	An Identity for the Main Term .....	286
7.3.2	The Improved Sifting Limit for Large $\kappa$ .....	288
7.4	Notes on Chapter 7 .....	291
	<b>References</b> .....	297
	<b>Index</b> .....	303
