Contents

Foreword, by D. J. Hand and A. M. Herzberg *page* ix
Preface, by D. R. Cox xi

1 Design of Investigations **1**
Commentaries **3**
Original papers **13**
D1 Some systematic experimental designs 13
D2 The design of an experiment in which certain treatment arrangements are inadmissible 25
D3 The use of a concomitant variable in selecting an experimental design 35
D4 The use of control observations as an alternative to incomplete block designs (with M. Atiqullah) 45
D5 Some systematic supersaturated designs (with K. H. V. Booth) 53
D6 Present position and potential developments: some personal views. Design of experiments and regression 61
D7 A note on design when response has an exponential family distribution 71
D8 Randomization and concomitant variables in the design of experiments 75
D9 Some sampling problems in technology 81
D10 On sampling and the estimation of rare errors (with E. J. Snell) 103

2 Statistical Methods **111**
Commentaries **113**
Original papers **129**
SM1 Some statistical methods connected with series of events 129
SM2 Multivariate point processes (with P. A. W. Lewis) 159
SM3 On the estimation of the intensity function of a stationary point process 207
SM4 The regression analysis of binary sequences 213
SM5 Two further applications of a model for binary regression 231
SM6 The analysis of multivariate binary data 235
SM7 The analysis of exponentially distributed life-times with two types of failure 243
SM8 Regression models and life-tables 255

Materiale protetto da copyright

SM9 A note on multiple time scales in life testing (with V. T. Farewell) 273
SM10 Linear dependencies represented by chain graphs (with N. Wermuth) 277
SM11 On the calculation of derived variables in the analysis of multivariate responses (with N. Wermuth) 293
SM12 Response models for mixed binary and quantitative variables (with N. Wermuth) 303
SM13 An analysis of transformations (with G. E. P. Box) 325
SM14 The role of statistical methods in science and technology 359
SM15 Combination of data 369
SM16 Interaction 377
SM17 Notes on some aspects of regression analysis 403
SM18 The choice of variables in observational studies (with E. J. Snell) 419
SM19 A general definition of residuals (with E. J. Snell) 429
SM20 Testing multivariate normality (with N. J. H. Small) 449
SM21 Some remarks on the role in statistics of graphical methods 459
SM22 Analysis of variability with large numbers of small samples (with P. J. Solomon) 465
SM23 Nonlinear component of variance models (with P. J. Solomon) 477
SM24 On partitioning means into groups (with E. Spjøtvoll) 489
SM25 Some quick sign tests for trend in location and dispersion (with A. Stuart) 495

3 Applications **511**
Commentaries **513**
Original papers **517**
A1 The relation between strength and diameter of wool fibres (with S. L. Anderson) 517
A2 Some statistical aspects of mixing and blending 529
A3 On a discriminatory problem connected with the works of Plato (with L. Brandwood) 539
A4 The distribution of the incubation period for the acquired immunodeficiency syndrome (AIDS) (with G. F. Medley, L. Billard, and R. M. Anderson) 545
A5 Quality and reliability: some recent developments and a historical perspective 557
A6 Quality-of-life assessment: can we keep it simple? (with R. Fitzpatrick, A. E. Fletcher, S. M. Gore, D. J. Spiegelhalter and D. R. Jones) 565

Contents of Volume II

Foreword, by D. J. Hand and A. M. Herzberg *page* ix
Preface, by D. R. Cox xi

4 Foundations of Statistical Inference **1**
Commentaries **3**
Original papers **9**
F1 Some problems connected with statistical inference 9
F2 The choice between alternative ancillary statistics 25
F3 The role of significance tests 31
F4 Statistical significance tests 47
F5 Foundations of statistical inference: the case for eclecticism 55
F6 Theory and general principle in statistics 69
F7 Role of models in statistical analysis 75
F8 Causality: some statistical aspects 81

5 Theoretical Statistics **93**
Commentaries **95**
Original papers **107**
Th1 Tests of separate families of hypotheses 107
Th2 Further results on tests of separate families of hypotheses 127
Th3 Fieller's theorem and a generalization 147
Th4 A note on the efficiency of least-squares estimates (with D. V. Hinkley) 153
Th5 The continuity correction 159
Th6 Prediction intervals and empirical Bayes confidence intervals 161
Th7 A note on data-splitting for the evaluation of significance levels 171
Th8 Partial likelihood 175
Th9 A note on partially Bayes inference and the linear model 183
Th10 A note on empirical Bayes inference in a finite Poisson process 187
Th11 Edgeworth and saddle-point approximations with statistical applications (with O. E. Barndorff-Nielsen) 191
Th12 Local ancillarity 213

Materiale protetto da copyright

Th13 Some remarks on overdispersion 221
Th14 Effective degrees of freedom and the likelihood ratio test 227
Th15 The effect of sampling rules on likelihood statistics (with O. E. Barndorff-Nielsen) 235
Th16 Two new tests associated with analysis of variance (with A. Azzalini) 253
Th17 Barlett adjustments to the likelihood ratio statistic and the distribution of the maximum likelihood estimator (with O. E. Barndorff-Nielsen) 263
Th18 Some general aspects of the theory of statistics 277
Th19 Invariants and likelihood ratio statistics (with P. McCullagh) 287
Th20 Approximations to noncentral distributions (with N. Reid) 299
Th21 Parameter orthogonality and approximate conditional inference (with N. Reid) 309
Th22 An approximation to maximum likelihood estimates in reduced models (with N. Wermuth) 329

6 Time Series **345**
Commentaries **347**
Original papers **351**
TS1 Prediction by exponentially weighted moving averages and related methods 351
TS2 Statistical analysis of time series: some recent developments 361
TS3 Long-range dependence: a review 379
TS4 Long-range dependence, non-linearity and time irreversibility 399

7 Stochastic Processes **407**
Commentaries **409**
Original papers **417**
SP1 The superposition of several strictly periodic sequences of events (with W. L. Smith) 417
SP2 On the superposition of renewal processes (with W. L. Smith) 429
SP3 A use of complex probabilities in the theory of stochastic processes 439
SP4 The analysis of non-Markovian stochastic processes by the inclusion of supplementary variables 447
SP5 On a statistical problem of E. A. Milne (with A. M. Herzberg) 457
SP6 A low traffic approximation for queues (with P. Bloomfield) 469
SP7 A bivariate point process connected with electronic counters (with V. Isham) 479
SP8 The virtual waiting-time and related processes (with V. Isham) 491
SP9 Spatial modelling of total storm rainfall (with I. Rodriguez-Iturbe and P. S. Eagleson) 507

Materiale protetto da copyright

SP10 Some models for rainfall based on stochastic point processes (with I. Rodriguez-Iturbe and V. Isham) 531
SP11 A simple spatial-temporal model of rainfall (with V. Isham) 551
