Robin Hartshorne

Ample Subvarieties of Algebraic Varieties

Notes written in Collaboration with C. Musili

Springer-Verlag
Berlin Heidelberg New York Tokyo

CONTENTS

Preface	...	III
<u>Introduction</u>	...	VII
Main implications of Chapters III,IV,V	...	XI
Notations, terminology and conventions	...	XII
Table of conjectures and open problems	...	XIV
<u>Chapter I</u> <u>Ample Divisors</u>	...	1
§ 0 Generalities on divisors	...	5
§ 1 Cartier divisors	...	7
§ 2 Linear systems	...	12
§ 3 Ample divisors	...	18
§ 4 Functorial properties	...	23
§ 5 Nakai's criterion	...	29
§ 6 Pseudo-ampleness	...	34
§ 7 Seshadri's criterion	...	37
§ 8 The ample cone	...	40
§ 9 Chevalley's conjecture	...	45
§ 10 Appendix: Curves on ruled surfaces, and examples of Mumford and Ramanujam		50

Chapter II	<u>Affine open subsets</u>	...	59
§ 1	Serre's criterion for affineness		61
§ 2	Sufficient conditions for the complement of a subvariety to be affine		64
§ 3	Necessary conditions	...	66
§ 4	Curves and surfaces	...	68
§ 5	Higher dimensions	...	72
§ 6	Goodman's criterion	...	76
Chapter III	<u>Generalization to higher codimensions</u>		81
§ 1	Ample vector bundles	...	83
§ 2	Ampleness of the tangent bundle on \mathbb{P}_k^n		86
§ 3	Cohomology of the complement of a subvariety	...	91
§ 4	Subvarieties with ample normal bundle		104
§ 5	Subvarieties of projective space		117
§ 6	Subvarieties of projective space in characteristic $p > 0$...	127
§ 7	Transcendental results in characteristic zero	...	145
§ 8	The Gysin sequence for algebraic De Rham cohomology	...	151
Chapter IV	<u>The Grothendieck-Lefschetz theorems</u>		162
§ 1	The Lefschetz conditions	...	164
§ 2	Application to the fundamental group		175
§ 3	Application to the Picard group		178
§ 4	Historical note	...	182

Chapter V	<u>Formal-rational functions along a subvariety</u>	186
§ 1	The ring of formal-rational functions ...	189
§ 2	A result of Speiser ...	200
§ 3	The theorem of Hironaka-Matsumura ...	203
§ 4	Exercises and problems ...	207
Chapter VI	<u>Algebraic Geometry and Analytic Geometry</u>	210
§ 1	Analogous results in analytic geometry ...	210
§ 2	Comparison theorems ...	221
§ 3	Affine schemes and Stein spaces ...	232
§ 4	Negative subvarieties and the contraction problem ...	236
	Index of definitions ...	237
	<u>Bibliography</u> ...	242
