Contents

Preface v
Notation xiii

Prologue: Sequences 1
1 Countability 1
2 Separability 7
3 The Diagonal Procedure 12
4 Bounded Sequences of Continuous Linear Maps 18

I FUNCTION SPACES AND THEIR DUALS 25

1 The Space of Continuous Functions on a Compact Set 27
1 Generalities 28
2 The Stone–Weierstrass Theorems 31
3 Ascoli's Theorem 42

2 Locally Compact Spaces and Radon Measures 49
1 Locally Compact Spaces 49
2 Daniell's Theorem 57
3 Positive Radon Measures 68
3A Positive Radon Measures on $\mathbb{R}$ and the Stieltjes Integral 71
3B Surface Measure on Spheres in $\mathbb{R}^d$ 74
4 Real and Complex Radon Measures 86

3 Hilbert Spaces **97**
1 Definitions, Elementary Properties, Examples 97
2 The Projection Theorem 105
3 The Riesz Representation Theorem 111
3A Continuous Linear Operators on a Hilbert Space . . 112
3B Weak Convergence in a Hilbert Space 114
4 Hilbert Bases 123

4 L^p Spaces **143**
1 Definitions and General Properties 143
2 Duality 159
3 Convolution 169

II OPERATORS **185**

5 Spectra **187**
1 Operators on Banach Spaces 187
2 Operators in Hilbert Spaces 201
2A Spectral Properties of Hermitian Operators 203
2B Operational Calculus on Hermitian Operators 205

6 Compact Operators **213**
1 General Properties 213
1A Spectral Properties of Compact Operators 217
2 Compact Selfadjoint Operators 234
2A Operational Calculus and the Fredholm Equation . . 238
2B Kernel Operators 240

III DISTRIBUTIONS **255**

7 Definitions and Examples **257**
1 Test Functions 257
1A Notation 257
1B Convergence in Function Spaces 259
1C Smoothing 261
1D C^∞ Partitions of Unity 262
2 Distributions 267
2A Definitions 267
2B First Examples 268
2C Restriction and Extension of a Distribution to an Open Set 271
2D Convergence of Sequences of Distributions 272
2E Principal Values 272
2F Finite Parts 273

3 Complements 280
3A Distributions of Finite Order 280
3B The Support of a Distribution 281
3C Distributions with Compact Support 281

8 Multiplication and Differentiation **287**
1 Multiplication 287
2 Differentiation 292
3 Fundamental Solutions of a Differential Operator 306
3A The Laplacian 307
3B The Heat Operator 310
3C The Cauchy–Riemann Operator 311

9 Convolution of Distributions **317**
1 Tensor Product of Distributions 317
2 Convolution of Distributions 324
2A Convolution in $\mathscr{E}'$ 324
2B Convolution in $\mathscr{D}'$ 325
2C Convolution of a Distribution with a Function . . . 332
3 Applications 337
3A Primitives and Sobolev's Theorem 337
3B Regularity 340
3C Fundamental Solutions and Partial Differential Equations 343
3D The Algebra $\mathscr{D}'_+$ 343

10 The Laplacian on an Open Set **349**
1 The spaces $H^1(\Omega)$ and $H_0^1(\Omega)$ 349
2 The Dirichlet Problem 363
2A The Dirichlet Problem 366
2B The Heat Problem 367
2C The Wave Problem 368

Answers to the Exercises **379**

Index **387**
