## Lie Groups and Subsemigroups with Surjective Exponential Function

Karl H. Hofmann  
Wolfgang A. F. Ruppert

---

November 1997 • Volume 130 • Number 618 (second of 4 numbers) • ISSN 0065-9266

---

**American Mathematical Society**  
Providence, Rhode Island

## CONTENTS

### Chapter 1. Introduction

1. The Problem and its Background	1
2. A Survey of Methods and Techniques	5
3. The Major Results	8
4. Suggestions for the Reader	10

### Chapter 2. The Basic Theory of Exponential Semigroups in Lie Groups

1. Basic Definitions and Examples	12
2. The Exponential Function and Divisibility	20
3. The Exponential Image of Lie Wedges and Regularity	24
4. Maximal Rank Subgroups	29
5. Interior Points in the Tangent Wedge	31

### Chapter 3. Weyl Groups and Finiteness Properties of Cartan Subalgebras

1. Cartan Dense Ideals	38
2. Algebraic Hulls	41
3. Generalized Weyl Groups	44
4. Intersections of Cartan Subalgebras	48
5. Porcupine Varieties	61
6. Porcupine Varieties are Proper	65
7. The Codimension of Porcupine Varieties	67

### Chapter 4. Lie Semialgebras

1. Semialgebras Revisited	75
2. Dispersion of Weakly Exponential Semigroups	79
3. More about Subtangent Vectors	80
4. Reductions by Factoring Normal Subgroups	83
5. Porcupine Varieties and Lie Semialgebras	86
6. Groups with a Unique Maximal Compact Subgroup	90
7. More about Lean Sets	92

Chapter 5. More Examples	
1. Examples Connected with the Special Linear Group	95
2. Some Results on Injective Images of Lie Subsemigroups	98
3. Examples Connected with the Motion Algebra	102
4. Examples Connected with the Oscillator Group	104
5. Examples Connected with Compact Lie Algebras	107
Chapter 6. Test Algebras and Groups	
1. Extensions of the Motion Algebra and of the Oscillator Algebra	109
2. Test Objects	111
3. Locally Direct Products of Lie Groups	115
4. The Proof of the Testing Theorem	119
Chapter 7. Groups Supporting Reduced Weakly Exponential Semigroups	
1. 'Occam's Razor' and Reduced Weakly Exponential Subsemigroups	126
2. The Spectrum of $\text{ad } w$ is Contained in $\mathbb{R} \cup i\mathbb{R}$	128
3. Root Spaces with Respect to Real-Valued Roots	132
4. Weakly Exponential Subsemigroups and Eggert Algebras	135
Chapter 8. Roots and Root Spaces	
1. Roots and Root Spaces	141
2. The Answer	145
Chapter 9. Appendix: The Hyperspace of a Locally Compact Space	
1. Continuous Lattices, Lawson Topology, and Hyperspaces	154
2. Continuous Functions	158
3. The Use of Nets	165
4. Applications to Topological Algebras	168
