Contents

Introduction	1
Chapter I. Test Functions	5
Summary	5
1.1. A review of Differential Calculus	5
1.2. Existence of Test Functions	14
1.3. Convolution	16
1.4. Cutoff Functions and Partitions of Unity	25
Notes	31
Chapter II. Definition and Basic Properties of Distributions	33
Summary	33
2.1. Basic Definitions	33
2.2. Localization	41
2.3. Distributions with Compact Support	44
Notes	52
Chapter III. Differentiation and Multiplication by Functions	54
Summary	54
3.1. Definition and Examples	54
3.2. Homogeneous Distributions	68
3.3. Some Fundamental Solutions	79
3.4. Evaluation of Some Integrals	84
Notes	86
Chapter IV. Convolution	87
Summary	87
4.1. Convolution with a Smooth Function	88
4.2. Convolution of Distributions	100
4.3. The Theorem of Supports	105
4.4. The Role of Fundamental Solutions	109

4.5. Basic L^p Estimates for Convolutions	116
Notes	124
Chapter V. Distributions in Product Spaces	126
Summary	126
5.1. Tensor Products	126
5.2. The Kernel Theorem	128
Notes	132
Chapter VI. Composition with Smooth Maps	133
Summary	133
6.1. Definitions	133
6.2. Some Fundamental Solutions	137
6.3. Distributions on a Manifold	142
6.4. The Tangent and Cotangent Bundles	146
Notes	156
Chapter VII. The Fourier Transformation	158
Summary	158
7.1. The Fourier Transformation in \mathcal{S} and in \mathcal{S}'	159
7.2. Poisson's Summation Formula and Periodic Distributions	177
7.3. The Fourier-Laplace Transformation in \mathcal{E}'	181
7.4. More General Fourier-Laplace Transforms	191
7.5. The Malgrange Preparation Theorem	195
7.6. Fourier Transforms of Gaussian Functions	205
7.7. The Method of Stationary Phase	215
7.8. Oscillatory Integrals	236
7.9. $H_{(s)}$, L^p and Hölder Estimates	240
Notes	248
Chapter VIII. Spectral Analysis of Singularities	251
Summary	251
8.1. The Wave Front Set	252
8.2. A Review of Operations with Distributions	261
8.3. The Wave Front Set of Solutions of Partial Differential Equations.	271
8.4. The Wave Front Set with Respect to C^L	280
8.5. Rules of Computation for WF_L	296
8.6. WF_L for Solutions of Partial Differential Equations	305
8.7. Microhyperbolicity	317
Notes	322

Chapter IX. Hyperfunctions	325
Summary	325
9.1. Analytic Functionals	326
9.2. General Hyperfunctions	335
9.3. The Analytic Wave Front Set of a Hyperfunction	338
9.4. The Analytic Cauchy Problem	346
9.5. Hyperfunction Solutions of Partial Differential Equations	353
9.6. The Analytic Wave Front Set and the Support	358
Notes	368
Exercises	371
Answers and Hints to All the Exercises	394
Bibliography	419
Index	437
Index of Notation	439
