Volume 20

Elementary Algebraic Geometry

Klaus Hulek

Translated by
Helena Verrill

Contents

Preface	vii
Chapter 0. Introduction	1
Exercises	15
Chapter 1. Affine Varieties	17
§1.1. Hilbert's Nullstellensatz	17
§1.2. Polynomial Functions and Maps	37
§1.3. Rational Functions and Maps	49
Exercises	58
Chapter 2. Projective Varieties	63
§2.1. Projective Space	63
§2.2. Projective Varieties	66
§2.3. Rational Functions and Morphisms	75
Exercises	94
Chapter 3. Smooth Points and Dimension	97
§3.1. Smooth and Singular Points	97
§3.2. Algebraic Characterization of the Dimension of a Variety	103
Exercises	112

Chapter 4. Plane Cubic Curves	115
§4.1. Plane Curves	115
§4.2. Intersection Multiplicity	118
§4.3. Classification of Smooth Cubics	126
§4.4. The Group Structure of an Elliptic Curve	136
Exercises	139
Chapter 5. Cubic Surfaces	143
§5.1. The Existence of Lines on a Cubic	144
§5.2. The Configuration of the 27 Lines	151
§5.3. Rationality of Cubics	161
Exercises	163
Chapter 6. Introduction to the Theory of Curves	167
§6.1. Divisors on Curves	167
§6.2. The Degree of a Principal Divisor	172
§6.3. Bézout's Theorem	182
§6.4. Linear Systems on Curves	184
§6.5. Projective Embeddings of Curves	193
Exercises	204
Bibliography	207
§A. Books on Commutative Algebra	207
§B. Books on Algebraic Geometry	207
§C. Other Literature	208
Index	211
