

Christoph Hummel

**Gromov's Compactness  
Theorem for Pseudo-  
holomorphic Curves**

Springer Basel AG

Author:

Christoph Hummel  
Institut für Mathematik      and      Department of Mathematics  
Universität Zürich                      University of Pennsylvania  
Winterthurer Str. 190                      209 South 33rd Street  
8057 Zürich                                      Philadelphia, PA 19104-6395  
Switzerland                                      USA

1991 Mathematics Subject Classification 53Cxx, 30Fxx

A CIP catalogue record for this book is available from the Library of Congress,  
Washington D.C., USA

# Contents

<b>Introduction</b> .....	<b>1</b>
<b>Chapter I Preliminaries</b>	
1. Riemannian manifolds .....	5
2. Almost complex and symplectic manifolds .....	7
3. $J$ -holomorphic maps .....	10
4. Riemann surfaces and hyperbolic geometry .....	11
5. Annuli .....	17
<b>Chapter II Estimates for area and first derivatives</b>	
1. Gromov's Schwarz- and monotonicity lemma .....	21
2. Area of $J$ -holomorphic maps .....	22
3. Isoperimetric inequalities for $J$ -holomorphic maps .....	23
4. Proof of the Gromov-Schwarz lemma .....	30
<b>Chapter III Higher order derivatives</b>	
1. 1-jets of $J$ -holomorphic maps .....	35
2. Removal of singularities .....	41
3. Converging sequences of $J$ -holomorphic maps .....	45
4. Variable almost complex structures .....	46
<b>Chapter IV Hyperbolic surfaces</b>	
1. Hexagons .....	49
2. Building hyperbolic surfaces from pairs of pants .....	55
3. Pairs of pants decomposition .....	59
4. Thick-thin decomposition .....	68
5. Compactness properties of hyperbolic structures .....	70
<b>Chapter V The compactness theorem</b>	
1. Cusp curves .....	79
2. Proof of the compactness theorem .....	82
3. Bubbles .....	91
<b>Chapter VI The squeezing theorem</b>	
1. Discussion of the statement .....	99
2. Proof modulo existence result for pseudo-holomorphic curves .....	102
3. The analytical setup: A rough outline .....	104
4. The required existence result .....	110

<b>Appendix A</b>	The classical isoperimetric inequality .....	<b>115</b>
<b>Appendix B</b>	The $C^k$ -topology .....	<b>117</b>
<b>References on pseudo-holomorphic curves</b>	.....	<b>121</b>
<b>Bibliography</b>	.....	<b>125</b>
<b>Index</b>	.....	<b>129</b>
