Taylor & Francis Group, an informa business

Full Contents

1. Curves in the Plane	1
1.1 Euclidean Space	2
1.2 Curves in Space	5
1.3 The Length of a Curve	9
1.4 Curvature of Plane Curves	14
1.5 Angle Functions	17
1.6 First Examples of Plane Curves	20
1.7 The Semicubical Parabola and Regularity	25
1.8 Exercises	27
Notebook 1	29
2. Famous Plane Curves	39
2.1 Cycloids	40
2.2 Lemniscates of Bernoulli	43
2.3 Cardioids	45
2.4 The Catenary	45
2.5 The Cissoid of Diocles	47
2.6 The Tractrix	50
2.7 Clothoids	53
2.8 Pursuit Curves	54
2.9 Exercises	57
Notebook 2	60
3. Alternative Ways of Plotting Curves	73
3.1 Implicitly Defined Plane Curves	74
3.2 The Folium of Descartes	76
3.3 Cassinian Ovals	79
3.4 Plane Curves in Polar Coordinates	81
3.5 A Selection of Spirals	82
3.6 Exercises	85
Notebook 3	88

4. New Curves from Old	99
4.1 Evolutes	99
4.2 Iterated Evolutes	102
4.3 Involutives	104
4.4 Osculating Circles to Plane Curves	107
4.5 Parallel Curves	110
4.6 Pedal Curves	113
4.7 Exercises	115
Notebook 4	118
 5. Determining a Plane Curve from its Curvature	 127
5.1 Euclidean Motions	128
5.2 Isometries of the Plane	133
5.3 Intrinsic Equations for Plane Curves	136
5.4 Examples of Curves with Assigned Curvature	140
5.5 Exercises	142
Notebook 5	146
 6. Global Properties of Plane Curves	 153
6.1 Total Signed Curvature	154
6.2 Trochoid Curves	157
6.3 The Rotation Index of a Closed Curve	160
6.4 Convex Plane Curves	164
6.5 The Four Vertex Theorem	166
6.6 Curves of Constant Width	169
6.7 Reuleaux Polygons and Involutives	172
6.8 The Support Function of an Oval	174
6.9 Exercises	178
Notebook 6	181
 7. Curves in Space	 191
7.1 The Vector Cross Product	192
7.2 Curvature and Torsion of Unit-Speed Curves	195
7.3 The Helix and Twisted Cubic	200
7.4 Arbitrary-Speed Curves in $\mathbb{R}^3$	203
7.5 More Constructions of Space Curves	206
7.6 Tubes and Tori	209
7.7 Torus Knots	211
7.8 Exercises	213
Notebook 7	217

8. Construction of Space Curves	229
8.1 The Fundamental Theorem of Space Curves	230
8.2 Assigned Curvature and Torsion	233
8.3 Contact	236
8.4 Space Curves That Lie on a Sphere	242
8.5 Curves of Constant Slope	246
8.6 Loxodromes on Spheres	250
8.7 Exercises	252
Notebook 8	254
9. Calculus on Euclidean Space	263
9.1 Tangent Vectors to $\mathbb{R}^n$	263
9.2 Tangent Vectors as Directional Derivatives	265
9.3 Tangent Maps or Differentials	268
9.4 Vector Fields on $\mathbb{R}^n$	272
9.5 Derivatives of Vector Fields	275
9.6 Curves Revisited	280
9.7 Exercises	281
Notebook 9	283
10. Surfaces in Euclidean Space	287
10.1 Patches in $\mathbb{R}^n$	288
10.2 Patches in $\mathbb{R}^3$ and the Local Gauss Map	295
10.3 The Definition of a Regular Surface	297
10.4 Examples of Surfaces	302
10.5 Tangent Vectors and Surface Mappings	307
10.6 Level Surfaces in $\mathbb{R}^3$	311
10.7 Exercises	316
Notebook 10	320
11. Nonorientable Surfaces	331
11.1 Orientability of Surfaces	331
11.2 Surfaces by Identification	336
11.3 The Möbius Strip	339
11.4 The Klein Bottle	341
11.5 Realizations of the Real Projective Plane	343
11.6 Twisted Surfaces	348
11.7 Exercises	350
Notebook 11	352

12. Metrics on Surfaces	361
12.1 The Intuitive Idea of Distance	361
12.2 Isometries between Surfaces	365
12.3 Distance and Conformal Maps	369
12.4 The Intuitive Idea of Area	372
12.5 Examples of Metrics	374
12.6 Exercises	377
Notebook 12	379
 13. Shape and Curvature	 385
13.1 The Shape Operator	386
13.2 Normal Curvature	389
13.3 Calculation of the Shape Operator	393
13.4 Gaussian and Mean Curvature	397
13.5 More Curvature Calculations	403
13.6 A Global Curvature Theorem	410
13.7 Nonparametrically Defined Surfaces	411
13.8 Exercises	415
Notebook 13	420
 14. Ruled Surfaces	 431
14.1 Definitions and Examples	432
14.2 Curvature of a Ruled Surface	437
14.3 Tangent Developables	440
14.4 Noncylindrical Ruled Surfaces	444
14.5 Exercises	449
Notebook 14	452
 15. Surfaces of Revolution and Constant Curvature ...	 461
15.1 Surfaces of Revolution	462
15.2 Principal Curves	465
15.3 Curvature of a Surface of Revolution	468
15.4 Generalized Helicoids	470
15.5 Surfaces of Constant Positive Curvature	473
15.6 Surfaces of Constant Negative Curvature	477
15.7 More Examples of Constant Curvature	480
15.8 Exercises	485
Notebook 15	488

16. A Selection of Minimal Surfaces	501
16.1 Normal Variation	502
16.2 Deformation from the Helicoid to the Catenoid	504
16.3 Minimal Surfaces of Revolution	507
16.4 More Examples of Minimal Surfaces	509
16.5 Monge Patches and Scherk's Minimal Surface	513
16.6 The Gauss Map of a Minimal Surface	516
16.7 Isothermal Coordinates	518
16.8 Exercises	521
Notebook 16	523
 17. Intrinsic Surface Geometry	 531
17.1 Intrinsic Formulas for the Gaussian Curvature	531
17.2 Gauss's Theorema Egregium	535
17.3 Christoffel Symbols	537
17.4 Geodesic Curvature of Curves on Surfaces	540
17.5 Geodesic Torsion and Frenet Formulas	545
17.6 Exercises	547
Notebook 17	548
 18. Asymptotic Curves and Geodesics on Surfaces ...	 557
18.1 Asymptotic Curves	558
18.2 Examples of Asymptotic Curves and Patches	562
18.3 The Geodesic Equations	565
18.4 First Examples of Geodesics	569
18.5 Clairaut Patches	572
18.6 Use of Clairaut Patches	576
18.7 Exercises	579
Notebook 18	582
 19. Principal Curves and Umbilic Points	 593
19.1 The Differential Equation for Principal Curves	594
19.2 Umbilic Points	597
19.3 The Peterson–Mainardi–Codazzi Equations	599
19.4 Hilbert's Lemma and Liebmann's Theorem	602
19.5 Triply Orthogonal Systems of Surfaces	604
19.6 Elliptic Coordinates	609
19.7 Parabolic Coordinates and a General Construction	615
19.8 Parallel Surfaces	620
19.9 The Shape Operator of a Parallel Surface	622

19.10 Exercises	625
Notebook 19	628
 20. Canal Surfaces and Cyclides of Dupin	 639
20.1 Surfaces Whose Focal Sets Are 2-Dimensional	641
20.2 Canal Surfaces	646
20.3 Cyclides of Dupin via Focal Sets	655
20.4 The Definition of Inversion	661
20.5 Inversion of Surfaces	665
20.6 Exercises	669
Notebook 20	673
 21. The Theory of Surfaces of Constant Negative Curvature	 683
21.1 Intrinsic Tchebyshef Patches	684
21.2 Patches on Surfaces of Constant Negative Curvature	687
21.3 The Sine-Gordon Equation	691
21.4 Tchebyshef Patches on Surfaces of Revolution	692
21.5 The Bianchi Transform	697
21.6 Moving Frames on Surfaces in $\mathbb{R}^3$	701
21.7 Kuen's Surface as Bianchi Transform of the Pseudosphere ..	704
21.8 The Bäcklund Transform	706
21.9 Exercises	710
Notebook 21	712
 22. Minimal Surfaces via Complex Variables	 719
22.1 Isometric Deformations of Minimal Surfaces	720
22.2 Complex Derivatives	725
22.3 Minimal Curves	728
22.4 Finding Conjugate Minimal Surfaces	732
22.5 The Weierstrass Representation	736
22.6 Minimal Surfaces via Björling's Formula	741
22.7 Costa's Minimal Surface	746
22.8 Exercises	752
Notebook 22	755

23. Rotation and Animation Using Quaternions	767
23.1 Orthogonal Matrices	769
23.2 Quaternion Algebra	775
23.3 Unit Quaternions and Rotations	779
23.4 Imaginary Quaternions and Rotations	783
23.5 Rotation Curves	785
23.6 Euler Angles	789
23.7 Further Topics	793
23.8 Exercises	797
Notebook 23	799
 24. Differentiable Manifolds	 809
24.1 The Definition of a Differentiable Manifold	810
24.2 Differentiable Functions on Manifolds	814
24.3 Tangent Vectors on Manifolds	819
24.4 Induced Maps	826
24.5 Vector Fields on Manifolds	831
24.6 Tensor Fields	836
24.7 Exercises	839
Notebook 24	842
 25. Riemannian Manifolds	 847
25.1 Covariant Derivatives	848
25.2 Pseudo-Riemannian Metrics	854
25.3 The Classical Treatment of Metrics	858
25.4 The Christoffel Symbols in Riemannian Geometry	861
25.5 The Riemann Curvature Tensor	863
25.6 Exercises	867
Notebook 25	868
 26. Abstract Surfaces and Their Geodesics	 871
26.1 Christoffel Symbols on Abstract Surfaces	872
26.2 Examples of Abstract Metrics	874
26.3 The Abstract Definition of Geodesic Curvature	878
26.4 Geodesics on Abstract Surfaces	880
26.5 The Exponential Map and the Gauss Lemma	884
26.6 Length Minimizing Properties of Geodesics	888
26.7 Exercises	892
Notebook 26	895

27. The Gauss–Bonnet Theorem	901
27.1 Turning Angles and Liouville's Theorem	902
27.2 The Local Gauss–Bonnet Theorem	906
27.3 An Area Bound	910
27.4 A Generalization to More Complicated Regions	911
27.5 The Topology of Surfaces	914
27.6 The Global Gauss–Bonnet Theorem	918
27.7 Applications of the Gauss–Bonnet Theorem	920
27.8 Exercises	921
Notebook 27	923
 Bibliography	 931
 Name Index	 953
 Subject Index	 957
 Notebook Index	 977
