Contents

Part I Introduction to linear dynamics

1	Topological dynamics	3
1.1	Dynamical systems	3
1.2	Topologically transitive maps	7
1.3	Chaos	11
1.4	Mixing maps	17
1.5	Weakly mixing maps	18
1.6	Universality	23
	Exercises	25
	Sources and comments	30
2	Hypercyclic and chaotic operators	31
2.1	Linear dynamical systems	31
2.2	Hypercyclic operators	37
2.3	Linear chaos	42
2.4	Mixing operators	46
2.5	Weakly mixing operators	48
2.6	The set of hypercyclic vectors	52
2.7	Linear vs nonlinear maps, and finite vs infinite dimension	54
2.8	Hypercyclicity and complex dynamics	58
	Exercises	59
	Sources and comments	65
3	The Hypercyclicity Criterion	69
3.1	Criteria for chaos and mixing	69
3.2	Weak mixing and the Hypercyclicity Criterion	73
3.3	Equivalent formulations of the Hypercyclicity Criterion	79
3.4	Hypercyclic sequences of operators	83
	Exercises	84
	Sources and comments	87

4	Classes of hypercyclic and chaotic operators	89
4.1	Weighted shifts	89
4.2	Differential operators	104
4.3	Composition operators I	110
4.4	Adjoint multipliers	118
4.5	Composition operators II	123
	Exercises	127
	Sources and comments	133
5	Necessary conditions for hypercyclicity and chaos	137
5.1	Spectral properties of hypercyclic and chaotic operators	137
5.2	Classes of non-hypercyclic operators on Banach spaces	141
5.3	Classes of non-hypercyclic operators on Hilbert spaces	150
	Exercises	155
	Sources and comments	159
6	Connectedness arguments in linear dynamics	161
6.1	Ansari's theorem	162
6.2	Somewhere dense orbits	164
6.3	Multi-hypercyclic operators	166
6.4	Hypercyclic semigroup actions	167
	Exercises	173
	Sources and comments	177

Part II Selected topics

7	Dynamics of semigroups, with applications to differential equations	181
7.1	Semigroups of operators	181
7.2	Hypercyclic and chaotic C_0 -semigroups	185
7.3	Discretizations of C_0 -semigroups	192
7.4	Criteria for the hypercyclicity and chaos of C_0 -semigroups	196
7.5	Applications of C_0 -semigroups to differential equations	201
	Exercises	205
	Sources and comments	210
8	Existence of hypercyclic operators	213
8.1	Mixing perturbations of the identity	213
8.2	Existence of mixing operators and semigroups	219
8.3	Density of hypercyclic operators	223
8.4	Existence of hypercyclic operators with prescribed orbits	225
	Exercises	228
	Sources and comments	231

9	Frequently hypercyclic operators	235
9.1	Frequently recurrent orbits	235
9.2	The Frequent Hypercyclicity Criterion	242
9.3	An eigenvalue criterion for frequent hypercyclicity	249
9.4	Structural properties	254
	Exercises	262
	Sources and comments	264
10	Hypercyclic subspaces	267
10.1	Operators with hypercyclic subspaces	267
10.2	Hypercyclic left-multiplication operators	276
10.3	Operators without hypercyclic subspaces	282
10.4	Further operators with hypercyclic subspaces	286
10.5	The Fréchet space setting	291
	Exercises	298
	Sources and comments	301
11	Common hypercyclic vectors	305
11.1	The Common Hypercyclicity Criterion	305
11.2	Common hypercyclic vectors for multiples of an operator	313
11.3	Further examples	317
11.4	Common hypercyclic subspaces	321
	Exercises	325
	Sources and comments	329
12	Linear dynamics in topological vector spaces	331
12.1	Topological vector spaces	331
12.2	Hypercyclicity, topological transitivity, and linear chaos	334
12.3	Dynamical transference principles	338
12.4	Mixing and weakly mixing operators	342
12.5	Criteria for weak mixing, mixing and chaos	345
	Exercises	346
	Sources and comments	349
	Appendix A – Prerequisites	351
	Appendix B – Spectral theory	361
	References	367
	Index	379
