|---------------------------------------------------------------------------------|------------|
| <b>Introduction</b>                                                             | <b>ix</b>  |
| <b>1 Preliminaries</b>                                                          | <b>1</b>   |
| 1.1 Function and distribution spaces . . . . .                                  | 1          |
| 1.2 Monotone operators, convex functions, and<br>subdifferentials . . . . .     | 8          |
| 1.3 Some elements of spectral theory . . . . .                                  | 18         |
| 1.4 Linear evolution equations and semigroups . . . . .                         | 23         |
| 1.5 Nonlinear evolution equations . . . . .                                     | 25         |
| <b>2 Elliptic boundary value problems</b>                                       | <b>33</b>  |
| 2.1 Nondegenerate elliptic boundary value problems . . . . .                    | 33         |
| 2.2 Degenerate elliptic boundary value problems . . . . .                       | 40         |
| <b>3 Parabolic problems with algebraic<br/>boundary conditions</b>              | <b>67</b>  |
| 3.1 Homogeneous boundary conditions . . . . .                                   | 68         |
| 3.2 Nonhomogeneous boundary conditions . . . . .                                | 75         |
| 3.3 Higher regularity of solutions . . . . .                                    | 81         |
| <b>4 Parabolic problems with<br/>algebraic-differential boundary conditions</b> | <b>91</b>  |
| 4.1 Homogeneous algebraic boundary condition . . . . .                          | 93         |
| 4.2 Nonhomogeneous algebraic boundary condition . . . . .                       | 100        |
| 4.3 Higher regularity of solutions . . . . .                                    | 104        |
| <b>5 Hyperbolic problems with algebraic<br/>boundary conditions</b>             | <b>109</b> |
| 5.1 Existence, uniqueness, and long-time behavior of solutions .                | 110        |
| 5.2 Higher regularity of solutions . . . . .                                    | 119        |

|           |                                                                                         |            |
|-----------|-----------------------------------------------------------------------------------------|------------|
| <b>6</b>  | <b>Hyperbolic problems with algebraic-differential boundary conditions</b>              | <b>129</b> |
| 6.1       | Existence, uniqueness, and long-time behavior of solutions . . . . .                    | 130        |
| 6.2       | Higher regularity of solutions . . . . .                                                | 134        |
| <b>7</b>  | <b>The Fourier method for abstract differential equations</b>                           | <b>139</b> |
| 7.1       | First order linear equations . . . . .                                                  | 139        |
| 7.2       | Semilinear first order equations . . . . .                                              | 145        |
| 7.3       | Second order linear equations . . . . .                                                 | 148        |
| 7.4       | Semilinear second order equations . . . . .                                             | 154        |
| <b>8</b>  | <b>The semigroup approach for abstract differential equations</b>                       | <b>157</b> |
| 8.1       | Semilinear first order equations . . . . .                                              | 157        |
| 8.2       | Hyperbolic partial differential systems with nonlinear boundary conditions . . . . .    | 165        |
| <b>9</b>  | <b>Nonlinear nonautonomous abstract differential equations</b>                          | <b>171</b> |
| 9.1       | First order differential and functional equations containing subdifferentials . . . . . | 172        |
| 9.2       | An application . . . . .                                                                | 192        |
| <b>10</b> | <b>Implicit nonlinear differential equations</b>                                        | <b>203</b> |
| 10.1      | Existence of solution . . . . .                                                         | 205        |
| 10.2      | Uniqueness of solution . . . . .                                                        | 224        |
| 10.3      | Continuous dependence of solution . . . . .                                             | 229        |
| 10.4      | Existence of periodic solutions . . . . .                                               | 238        |
|           | <b>Index</b>                                                                            | <b>241</b> |
