Real Enriques Surfaces

Springer

PART II. ENRIQUES SURFACES	88
Summary: Deformation classes	89
Chapter V. Topology of real Enriques surfaces	97
9. Homology of a generalized real Enriques surface	98
10. Gluing eigenlattices	109
11. Topological classification	115
12. Calculation of the Pontrjagin-Viro form	119
Chapter VI. Moduli of real Enriques surfaces	127
13. Periods of $K3$ -surfaces	127
14. Periods of real Enriques surfaces	134
15. Quaternionic structure and Donaldson's trick	137
16. The fundamental polyhedron and topology of the real point set	140
Chapter VII. Deformation types: the hyperbolic and parabolic cases	145
17. Del Pezzo surfaces	146
18. Almost Del Pezzo surfaces $((g, r)$ -surfaces, $g \geq 3, r \geq 1$)	149
19. Surfaces with a genus 2 component $((2, r)$ -surfaces, $r \geq 1$)	155
20. Surfaces with a genus 1 component $((1, r)$ -surfaces)	158
Chapter VIII. Deformation types: the elliptic and parabolic cases	169
21. Invariants and preliminary results	170
22. Classification of actions	179
Appendix A. Beginner's manual on the moduli of real curves and surfaces	191
A1. Abstract curves	191
A2. Hyperelliptic curves on rational ruled surfaces	192
A3. Rigid isotopies of curves on surfaces	201
A4. Surfaces	211
Appendix B. Horikawa models	213
Appendix C. Determination of real Enriques surfaces	222
Appendix D. Finiteness results	232
Bibliography	242
Glossary	249
Index	254
