

Murray H. Protter Charles B. Morrey, Jr.

A First Course in Real Analysis

Second Edition

With 143 Illustrations

Springer-Verlag

New York Berlin Heidelberg London Paris
Tokyo Hong Kong Barcelona Budapest

Contents

Preface to the Second Edition	vii
Preface to the First Edition	xi
CHAPTER 1	
The Real Number System	1
1.1 Axioms for a Field	1
1.2 Natural Numbers and Sequences	9
1.3 Inequalities	15
1.4 Mathematical Induction	25
CHAPTER 2	
Continuity and Limits	30
2.1 Continuity	30
2.2 Limits	35
2.3 One-Sided Limits	42
2.4 Limits at Infinity; Infinite Limits	48
2.5 Limits of Sequences	55
CHAPTER 3	
Basic Properties of Functions on $\mathbb{R}^1$	59
3.1 The Intermediate-Value Theorem	59
3.2 Least Upper Bound; Greatest Lower Bound	62
3.3 The Bolzano–Weierstrass Theorem	68
3.4 The Boundedness and Extreme-Value Theorems	70
3.5 Uniform Continuity	72
3.6 The Cauchy Criterion	75
3.7 The Heine–Borel and Lebesgue Theorems	77
	xv

CHAPTER 4

Elementary Theory of Differentiation 83

- 4.1 The Derivative in $\mathbb{R}^1$ 83
 4.2 Inverse Functions in $\mathbb{R}^1$ 94

CHAPTER 5

Elementary Theory of Integration 98

- 5.1 The Darboux Integral for Functions on $\mathbb{R}^1$ 98
 5.2 The Riemann Integral 111
 5.3 The Logarithm and Exponential Functions 117
 5.4 Jordan Content and Area 122

CHAPTER 6

Elementary Theory of Metric Spaces 130

- 6.1 The Schwarz and Triangle Inequalities; Metric Spaces 130
 6.2 Elements of Point Set Topology 136
 6.3 Countable and Uncountable Sets 145
 6.4 Compact Sets and the Heine-Borel Theorem 150
 6.5 Functions on Compact Sets 157
 6.6 Connected Sets 161
 6.7 Mappings from One Metric Space to Another 164

CHAPTER 7

Differentiation in $\mathbb{R}^N$ 173

- 7.1 Partial Derivatives and the Chain Rule 173
 7.2 Taylor's Theorem; Maxima and Minima 178
 7.3 The Derivative in $\mathbb{R}^N$ 188

CHAPTER 8

Integration in $\mathbb{R}^N$ 194

- 8.1 Volume in $\mathbb{R}^N$ 194
 8.2 The Darboux Integral in $\mathbb{R}^N$ 197
 8.3 The Riemann Integral in $\mathbb{R}^N$ 203

CHAPTER 9

Infinite Sequences and Infinite Series 211

- 9.1 Tests for Convergence and Divergence 211
 9.2 Series of Positive and Negative Terms; Power Series 216
 9.3 Uniform Convergence of Sequences 222
 9.4 Uniform Convergence of Series; Power Series 230
 9.5 Unordered Sums 241
 9.6 The Comparison Test for Unordered Sums; Uniform Convergence 250
 9.7 Multiple Sequences and Series 254

CHAPTER 10	
Fourier Series	263
10.1 Expansions of Periodic Functions	263
10.2 Sine Series and Cosine Series; Change of Interval	270
10.3 Convergence Theorems	275
CHAPTER 11	
Functions Defined by Integrals; Improper Integrals	285
11.1 The Derivative of a Function Defined by an Integral; the Leibniz Rule	285
11.2 Convergence and Divergence of Improper Integrals	290
11.3 The Derivative of Functions Defined by Improper Integrals; the Gamma Function	295
CHAPTER 12	
The Riemann–Stieltjes Integral and Functions of Bounded Variation	305
12.1 Functions of Bounded Variation	305
12.2 The Riemann–Stieltjes Integral	316
CHAPTER 13	
Contraction Mappings, Newton's Method, and Differential Equations	329
13.1 A Fixed Point Theorem and Newton's Method	329
13.2 Application of the Fixed Point Theorem to Differential Equations	335
CHAPTER 14	
Implicit Function Theorems and Lagrange Multipliers	341
14.1 The Implicit Function Theorem for a Single Equation	341
14.2 The Implicit Function Theorem for Systems	348
14.3 Change of Variables in a Multiple Integral	359
14.4 The Lagrange Multiplier Rule	369
CHAPTER 15	
Functions on Metric Spaces; Approximation	374
15.1 Complete Metric Spaces	374
15.2 Convex Sets and Convex Functions	381
15.3 Arzela's Theorem; the Tietze Extension Theorem	393
15.4 Approximations and the Stone–Weierstrass Theorem	403
CHAPTER 16	
Vector Field Theory; the Theorems of Green and Stokes	413
16.1 Vector Functions on $\mathbb{R}^3$	413
16.2 Vector Functions and Fields on $\mathbb{R}^N$	423

16.3	Line Integrals in $\mathbb{R}^n$	434
16.4	Green's Theorem in the Plane	445
16.5	Surfaces in $\mathbb{R}^3$; Parametric Representation	455
16.6	Area of a Surface in $\mathbb{R}^3$; Surface Integrals	461
16.7	Orientable Surfaces	471
16.8	The Stokes Theorem	477
16.9	The Divergence Theorem	486
Appendixes		495
Appendix 1	Absolute Value	495
Appendix 2	Solution of Algebraic Inequalities	499
Appendix 3	Expansions of Real Numbers in Any Base	503
Appendix 4	Vectors in E_N	507
Answers to Odd-Numbered Problems		515
Index		529
