Green's Functions

Potential Fields on Surfaces

Contents

1	Green's Functions for ODE	1
1.1	Two-Point-Posed Boundary Value Problems	1
1.1.1	Existence and Uniqueness Theorem	3
1.1.2	Symmetry of Green's Functions	15
1.1.3	An Alternative Procedure	23
1.2	Multiple-Point-Posed Problems	33
1.2.1	Matrices of Green's Type	34
1.2.2	Existence and Uniqueness	36
1.2.3	Construction Procedure	41
1.3	Chapter Exercises	49
2	Spherical Surface	51
2.1	Basics of the Resolving Algorithm	52
2.2	Triangular Shaped Region	57
2.3	Belt-Shaped Region	63
2.4	Quadrilateral-Shaped Region	70
2.5	Robin Problem for Spherical Cap	73
2.6	Spherical Sector	78
2.7	Chapter Exercises	81
3	Toroidal Surface	85
3.1	Quadrilateral-Shaped Region	85
3.2	Toroidal Sector	92
3.3	Belt-Shaped Region	98
3.4	Chapter Exercises	104
4	Compound Structures	107
4.1	Matrices of Green's Type for PDE	107
4.2	Compound Hemisphere	110
4.3	Hemisphere Joint to Cylinder	118

4.4	Three-Fragment Assembly	128
4.5	Chapter Exercises	142
5	Irregular Configurations	147
5.1	Green's Function Version of the BIEM	148
5.2	Regions of Irregular Shape	157
5.3	Optimal Shape Design Problems	165
Appendix A: Catalogue of Green's Functions		173
