Maxwell Macmillan Canada
Toronto

Maxwell Macmillan International
New York Oxford Singapore Sydney

Contents

1	Logic and Proofs	1
1.1	Propositions	2
1.2	Conditional Propositions and Logical Equivalence	9
1.3	Quantifiers	19
1.4	Proofs	36
1.5	Mathematical Induction	45
	Notes	58
	Chapter Review	58
	Chapter Self-Test	60
2	The Language of Mathematics	63
2.1	Sets	64
2.2	Sequences and Strings	74
2.3	Relations	84
2.4	Equivalence Relations	96
2.5	Matrices of Relations	104
†2.6	Relational Databases	109

†Can be omitted without loss of continuity.

2.7	Functions	116
	Notes	127
	Chapter Review	128
	Chapter Self-Test	130

3 Algorithms 135

3.1	Introduction	136
3.2	Notation for Algorithms	138
3.3	The Euclidean Algorithm	146
3.4	Recursive Algorithms	152
3.5	Complexity of Algorithms	162
3.6	Analysis of the Euclidean Algorithm	182
	Notes	186
	Chapter Review	186
	Chapter Self-Test	188

4 Counting Methods and the Pigeonhole Principle 191

4.1	Basic Principles	192
4.2	Permutations and Combinations	203
4.3	Algorithms for Generating Permutations and Combinations	219
4.4	Generalized Permutations and Combinations	226
4.5	Binomial Coefficients and Combinatorial Identities	234
4.6	The Pigeonhole Principle	241
	Notes	247
	Chapter Review	247
	Chapter Self-Test	248

5 Recurrence Relations 251

5.1	Introduction	252
5.2	Solving Recurrence Relations	269
5.3	Applications to the Analysis of Algorithms	284
	Notes	300
	Chapter Review	300
	Chapter Self-Test	301

6 Graph Theory 303

- 6.1 Introduction 304
- 6.2 Paths and Cycles 316
- 6.3 Hamiltonian Cycles and the Traveling Salesperson Problem 331
- 6.4 A Shortest-Path Algorithm 340
- 6.5 Representations of Graphs 347
- 6.6 Isomorphisms of Graphs 354
- 6.7 Planar Graphs 364
- †6.8 Instant Insanity 373
 - Notes 380
 - Chapter Review 381
 - Chapter Self-Test 383

7 Trees 387

- 7.1 Introduction 388
- 7.2 Terminology and Characterizations of Trees 397
- 7.3 Spanning Trees 404
- 7.4 Minimal Spanning Trees 413
- 7.5 Binary Trees 421
- 7.6 Tree Traversals 430
- 7.7 Decision Trees and the Minimum Time for Sorting 437
- 7.8 Isomorphisms of Trees 447
- 7.9 Game Trees 460
 - Notes 472
 - Chapter Review 472
 - Chapter Self-Test 474

8 Network Models and Petri Nets 481

- 8.1 Network Models 482
- 8.2 A Maximal Flow Algorithm 489
- 8.3 The Max Flow, Min Cut Theorem 499
- 8.4 Matching 504
- 8.5 Petri Nets 511
 - Notes 521
 - Chapter Review 522
 - Chapter Self-Test 524

9 Boolean Algebras and Combinatorial Circuits 527

- 9.1 Combinatorial Circuits 528
- 9.2 Properties of Combinatorial Circuits 537
- 9.3 Boolean Algebras 544
- 9.4 Boolean Functions and Synthesis of Circuits 551
- 9.5 Applications 558
 - Notes 569
 - Chapter Review 570
 - Chapter Self-Test 571

10 Automata, Grammars, and Languages 575

- 10.1 Sequential Circuits and Finite-State Machines 576
- 10.2 Finite-State Automata 584
- 10.3 Languages and Grammars 593
- 10.4 Nondeterministic Finite-State Automata 606
- 10.5 Relationships Between Languages and Automata 615
 - Notes 623
 - Chapter Review 624
 - Chapter Self-Test 625

11 Computational Geometry 629

- 11.1 The Closest-Pair Problem 630
- †11.2 A Lower Bound for the Closest-Pair Problem 636
- 11.3 An Algorithm to Compute the Convex Hull 639
 - Notes 648
 - Chapter Review 649
 - Chapter Self-Test 649

Appendix: Matrices 651

References 659

Hints and Solutions to Selected Exercises 665

Index 787
