

IAN STEWART AND DAVID TALL

The foundations of mathematics

OXFORD UNIVERSITY PRESS

Contents

I: The intuitive background	
1. Mathematical thinking	3
2. Number systems	12
II: The beginnings of formalization	
3. Sets	41
4. Relations	62
5. Functions	84
6. Mathematical logic	109
7. Mathematical proof	133
III: The development of axiomatic systems	
8. Natural numbers and proof by induction	145
9. The real numbers	172
10. The real numbers as a complete ordered field	191
11. Complex numbers and beyond	206
12. Cardinal numbers	229
IV: Strengthening the foundations	
13. Axioms for set theory	251
References	259
Index	261
