## **Table of Contents**

| Preface  | v  |
|--|----|
| Part One: Computer Hardware                                      |    |
| Chapter 1: What computer should I use?                           | 1  |
| Chapter 2: How do I make my computer work best with Mathematica? | 4  |
| Part Two: First Time   |    |
| Chapter 3: How do I start Mathematica?                           | 10 |
| Chapter 4: Can I read the rest of this book without reading      |    |
| this chapter?  | 12 |
| Chapter 5: What do characters like *, (, [, {, *, *, etc. mean   |    |
| in Mathematica?  | 15 |
| Chapter 6: What's the difference between numerical and           |    |
| symbolic calculation?  | 17 |
| Part Three: Things to Do on the First Day                        |    |
| Chapter 7: How do I make a pretty picture?                       | 21 |
| Chapter 8: How do I ask Mathematica for help?                    | 29 |
| Chapter 9: How do I define constants and functions?              | 33 |
| Chapter 10: How do I load a package?                             | 36 |
| Chapter 11: Why didn't it work when I tried to load a package?   | 38 |
| Chapter 12: Can I explore mathematics with Mathematica?          | 40 |
| Part Four: Lists, Tables, Vectors, and Matrices                  |    |
| Chapter 13: What are lists and what can I do with them?          | 44 |
| Chapter 14: How do I make a table of values?                     | 49 |
| Chapter 15: How do I manipulate vectors and matrices?            | 57 |
|  |    |

| Part Five: Numerical Calculations                                   |     |
|---|-----|
| Chapter 16: What's the difference between 2 and 2.?                 | 62  |
| Part Six: Algebra   |     |
| Chapter 17: How do I manipulate polynomials?                        | 66  |
| Chapter 18: How do I solve equations?                               | 69  |
| Part Seven: Calculus  |     |
| Chapter 19: How do I integrate and differentiate?                   | 73  |
| Chapter 20: How do I find limits?                                   | 82  |
| Chapter 21: How do I solve differential equations?                  | 85  |
| Part Eight: Two-Dimensional Plotting                                |     |
| Chapter 22: How do I plot a function in two dimensions?             | 89  |
| Chapter 23: How do I plot a parametric equation in two dimensions?  | 98  |
| Chapter 24: How do I plot in polar coordinates?                     | 101 |
| Chapter 25: How do I plot implicitly defined functions?             | 103 |
| Chapter 26: How do I show the area between curves?                  | 108 |
| Part Nine: Three-Dimensional Plotting                               |     |
| Chapter 27: How do I plot a function in three dimensions?           | 111 |
| Chapter 28: How do I plot a parametric equation in three            |     |
| dimensions?   | 119 |
| Chapter 29: How do I plot in cylindrical and spherical coordinates? | 124 |
| Part Ten: Other Graphics and Sounds                                 |     |
| Chapter 30: How do I make contour and density plots?                | 128 |
| Chapter 31: How do I plot a list of values?                         | 133 |
| Chapter 32: How do I make sounds?                                   | 140 |
| Chapter 33: How do I make animations?                               | 148 |

| Part Eleven: Notebooks                                    |     |
|---|-----|
| Chapter 34: How do I use Mathematica as a word processor? | 157 |
| Chapter 35: How do I use Mathematica as an outliner?      | 169 |
| Part Twelve: Statistics and Data Analysis                 |     |
| Chapter 36: How do I do statistics?                       | 175 |
| Chapter 37: How do I fit a curve to data?                 | 182 |
| Part Thirteen: Programming                                |     |
| Chapter 38: How do I program in Mathematica?              | 187 |
| Chapter 39: Should I ever use a For loop?                 | 199 |
| Chapter 40: How do I use patterns?                        | 204 |
