M.J. Taylor

Elliptic Functions and Rings of Integers

1987

Birkhäuser
Boston · Basel · Stuttgart

CONTENTS

	Page
PREFACE	vii
INTRODUCTION	xiii
BASIC NOTATION	xvii
I. CYCLOTOMIC RESULTS	1
1. The Kronecker-Weber Theorem	1
2. Rings of Integers as algebras	3
3. Galois module structure	5
4. Kummer cyclotomic extensions	8
II. CLASSFIELD THEORY	9
1. Local Classfield Theory	9
2. Global Classfield Theory and ideal groups	12
3. Global Classfield Theory and idèles	17
4. Dirichlet density	25
III. ELLIPTIC FUNCTIONS	29
1. Generalities	29
2. The Weierstrass $\wp$ -function	34
3. The Weierstrass ζ and σ -functions	39
4. Elliptic curves and complex multiplication	45
IV. FUETER'S ELLIPTIC FUNCTIONS	52
1. The Fueter model	52
2. The addition formula	58
3. Multiplication formulas	59

	Page
V. COMPLEX MULTIPLICATIONS	66
1. The complex multiplication formulae	67
2. The division values of T .	71
3. The division values of T_1 .	77
VI. THE RESOLVENT FUNCTIONS	80
1. The Gauss sum - conductor formula	80
2. Abel's resolvents	81
3. Singular values of $R_{\mu,n}$	86
VII. MODULAR FUNCTIONS	87
1. Modular forms and cusps	87
2. The standard modular forms	91
3. The q -expansion principle	93
4. The Weber and Fricke functions	96
5. The complex multiplication case	101
VIII. MODULAR FUNCTIONS OF 2-POWER LEVEL	109
1. The function $\ell^2 - 2^k$	109
2. Dedekind's η -function	112
3. Certain modular units	115
4. The complex multiplication case	119
IX. GALOIS ACTION	122
1. Galois action on roots of unity	122
2. Singular values of the j -function	124
3. Singular values of the Weber function	126
4. Singular values of Pueter functions	129
5. Singular values of ℓ	132
6. Galois action on T_1 -division values	135
X. FORMAL GROUPS	139
1. Lubin-Tate formal groups	139
2. Trace relations	144
3. Local Galois module structure	147
4. Associated orders when $L = \mathbb{Q}_p$	153
5. The formal group of an elliptic curve	155

	Page
XI. RINGS OF INTEGERS OF ABELIAN EXTENSIONS OF QUADRATIC IMAGINARY NUMBER FIELDS	161
1. The algebra structure of rings of integers	
2. Galois module structure of rings of integers	167
3. The associated order	171
APPENDIX	178
GLOSSARY OF NOTATION	195
GLOSSARY OF FORMULAE	197
