

INTRODUCTION TO MODERN ALGEBRA

Marvin Marcus

Institute for the Interdisciplinary
Applications of Algebra and Combinatorics
University of California, Santa Barbara
Santa Barbara, California

MARCEL DEKKER, INC. New York and Basel

Contents

Preface	vii
1. Basic Structures	1
1.1 Sets and Functions	1
Exercises	14
Glossary	15
1.2 Algebraic Structures	16
Exercises	25
Glossary	30
1.3 Permutation Groups	31
Exercises	52
Glossary	54
2. Groups	56
2.1 Isomorphism Theorems	56
Exercises	83
Glossary	86
2.2 Group Actions and the Sylow Theorems	86
Exercises	106
Glossary	109
2.3 Some Additional Topics	109
Exercises	123
Glossary	123
3. Rings and Fields	124
3.1 Basic Facts	124
Exercises	136

	Glossary	138
3.2	Introduction to Polynomial Rings	139
	Exercises	170
	Glossary	172
3.3	Unique Factorization Domains	173
	Exercises	190
	Glossary	193
3.4	Polynomial Factorization	194
	Exercises	216
	Glossary	224
3.5	Polynomials and Resultants	225
	Exercises	255
	Glossary	257
3.6	Applications to Geometric Constructions	257
	Exercises	263
	Glossary	264
3.7	Galois Theory	264
	Exercises	282
	Glossary	285
4.	Modules and Linear Operators	287
4.1	The Hermite Normal Form	287
	Exercises	316
	Glossary	319
4.2	The Smith Normal Form	320
	Exercises	344
	Glossary	350
4.3	The Structure of Linear Transformations	351
	Exercises	381
	Glossary	396
4.4	Introduction to Multilinear Algebra	396
	Exercises	411
	Glossary	412
5.	Representations of Groups	413
5.1	Representations	413
	Exercises	435
	Glossary	439
5.2	Matrix Representations	440
	Exercises	474
	Glossary	477
	Index	479
