Contents

Preface to the Classics Edition ix

Preface xi

Chapter 1 Introduction 1

Chapter 2 Analysis of the Least Squares Problem 5

Chapter 3 Orthogonal Decomposition by Certain Elementary Orthogonal Transformations 9

Chapter 4 Orthogonal Decomposition by Singular Value Decomposition 18

Chapter 5 Perturbation Theorems for Singular Values 23

Chapter 6 Bounds for the Condition Number of a Triangular Matrix 28

Chapter 7 The Pseudoinverse 36

Chapter 8 Perturbation Bounds for the Pseudoinverse 41

Chapter 9 Perturbation Bounds for the Solution of Problem LS 49

Chapter 10 Numerical Computations Using Elementary Orthogonal Transformations 53

Chapter 11 Computing the Solution for the Overdetermined or Exactly Determined Full Rank Problem 63

Chapter 12 Computation of the Covariance Matrix of the Solution Parameters 67

Chapter 13 Computing the Solution for the Underdetermined Full Rank Problem 74

Chapter 14 Computing the Solution for Problem LS with Possibly Deficient Pseudorank 77

Chapter 15 Analysis of Computing Errors for Householder Transformations 83

Chapter 16 Analysis of Computing Errors for the Problem LS 90

Downloaded 09/04/25 to 193.206.101.2 . Redistribution subject to SIAM license or copyright; see https://epubs.siam.org/terms-privacy

Chapter 17 Analysis of Computing Errors for the Problem LS Using Mixed Precision Arithmetic 100

Chapter 18 Computation of the Singular Value Decomposition and the Solution of Problem LS 107
Section 1 Introduction 107
Section 2 The Symmetric Matrix QR Algorithm 108
Section 3 Computing the Singular Value Decomposition 110
Section 4 Solving Problem LS Using SVD 117
Section 5 Organization of a Computer Program for SVD 118

Chapter 19 Other Methods for Least Squares Problems 121
Section 1 Normal Equations with Cholesky Decomposition 122
Section 2 Modified Gram-Schmidt Orthogonalization 129

Chapter 20 Linear Least Squares with Linear Equality Constraints Using a Basis of the Null Space 134

Chapter 21 Linear Least Squares with Linear Equality Constraints by Direct Elimination 144

Chapter 22 Linear Least Squares with Linear Equality Constraints by Weighting 148

Chapter 23 Linear Least Squares with Linear Inequality Constraints 158
Section 1 Introduction 158
Section 2 Characterization of a Solution 159
Section 3 Problem NNLS 160
Section 4 Problem LDP 165
Section 5 Converting Problem LSI to Problem LDP 167
Section 6 Problem LSI with Equality Constraints 168
Section 7 An Example of Constrained Curve Fitting 169

Chapter 24 Modifying a QR Decomposition to Add or Remove Column Vectors 174

Chapter 25 Practical Analysis of Least Squares Problems 180
Section 1 General Considerations 180
Section 2 Left Multiplication of A and b by a Matrix G 183
Section 3 Right Multiplication of A by a Matrix H and Change of Variables $x = H\tilde{x} + \xi$ 185
Section 4 Append Additional Rows to $[A:b]$ 188
Section 5 Deleting Variables 194
Section 6 Singular Value Analysis 196

Downloaded 09/04/25 to 193.206.101.2 . Redistribution subject to SIAM license or copyright; see https://epubs.siam.org/terms-privacy

Chapter 26 Examples of Some Methods of Analyzing a Least Squares Problem 199

Chapter 27 Modifying a QR Decomposition to Add or Remove Row Vectors with Application to Sequential Processing of Problems Having a Large or Banded Coefficient Matrix 207
Section 1 Sequential Accumulation 208
Section 2 Sequential Accumulation of Banded Matrices 212
Section 3 An Example: Line Splines 219
Section 4 Data Fitting Using Cubic Spline Functions 222
Section 5 Removing Rows of Data 225

Appendix A Basic Linear Algebra Including Projections 233

Appendix B Proof of Global Quadratic Convergence of the QR Algorithm 240

Appendix C Description and Use of FORTRAN Codes for Solving Problem LS 248

Appendix D Developments from 1974 to 1995 284

Bibliography 312

Index 327
