## Contents

Part I. Basic Ideas and Examples						
1.	Rea	al and Complex Matrix Groups	3			
	1.1	Groups of Matrices	3			
	1.2	Groups of Matrices as Metric Spaces	5			
	1.3	Compactness	12			
	1.4	Matrix Groups	15			
	1.5	Some Important Examples	18			
	1.6	Complex Matrices as Real Matrices	29			
	1.7	Continuous Homomorphisms of Matrix Groups	31			
	1.8	Matrix Groups for Normed Vector Spaces	33			
	1.9	Continuous Group Actions	37			
2.	Exp	Exponentials, Differential Equations and One-parameter Sub-				
	gro	ups	45			
	2.1	The Matrix Exponential and Logarithm	45			
	2.2	Calculating Exponentials and Jordan Form	51			
	2.3	Differential Equations in Matrices	55			
	2.4	One-parameter Subgroups in Matrix Groups	56			
	2.5	One-parameter Subgroups and Differential Equations	59			
3.	Tangent Spaces and Lie Algebras					
	3.1	Lie Algebras	67			
	3.2	Curves, Tangent Spaces and Lie Algebras	71			
	3.3	The Lie Algebras of Some Matrix Groups	76			

x Contents
