

Variational Principles in Dynamics and Quantum Theory

Wolfgang Yourgrau
Stanley Mandelstam

Dover Publications, Inc., New York

Contents

<i>Preface to the Third Edition</i>	vii
<i>Preface to the Second Edition</i>	ix
<i>Preface to the First Edition</i>	xi
§ 1. Prolegomena	1
§ 2. Fermat's Principle of Least Time	11
§ 3. The Principle of Least Action of Maupertuis	19
§ 4. The Development of this Principle by Euler and Lagrange	24
§ 5. The Equations of Lagrange and Hamilton	33
§ 6. Hamilton's Principle and the Hamilton-Jacobi Equation	45
§ 7. Contact Transformations and Hamilton's Canonical Equations	65
§ 8. Electrodynamics in Hamiltonian Form	72
§ 9. Résumé of Variational Principles in Classical Mechanics	92
§ 10. Relation between Variational Principles and the Older Form of Quantum Theory	97
§ 11. Variational Principles and Wave Mechanics	116
§ 12. The Principles of Feynman and Schwinger in Quantum Mechanics	127
§ 13. Variational Principles in Hydrodynamics	142
§ 14. The Significance of Variational Principles in Natural Philosophy	162
REFERENCES	181
GENERAL REFERENCES	184
APPENDIX 1. Proof of the Euler-Lagrange Conditions for an Integral to be Stationary	187
APPENDIX 2. Variational Principles and Chemical Reactions	191
<i>Index</i>	198
