# The Cauchy Problem for Higher-Order Abstract Differential Equations

Springer

# Contents

<b>Chapter 1. Laplace transforms and operator families in locally convex spaces</b>	
Summary .....	1
1.1 Laplace transforms .....	2
1.2 An integrated version of Widder's theorem in SCLCS .....	8
1.3 Integrated, regularized semigroups .....	12
1.4 Integrated, regularized cosine functions .....	18
1.5 Differential operators as generators .....	19
1.6 Relationship to Cauchy problems .....	35
1.7 Notes .....	42
<b>Chapter 2. Wellposedness and solvability</b>	
Summary .....	45
2.1 Basic properties .....	46
2.2 Strong wellposedness .....	54
2.3 Solvability .....	67
2.4 Perturbation .....	68
2.5 Two typical cases .....	74
2.6 Notes .....	78
<b>Chapter 3. Generalized wellposedness</b>	
Summary .....	85
3.1 Criteria for general $(ACP_n)$ .....	86
3.2 The special case (I): coefficient operators relating to integrated semigroups .....	91
3.3 The special case (II): coefficient operators relating to integrated semigroups (continuation) .....	99
3.4 The special case (III): coefficient operators relating to integrated cosine functions .....	111
3.5 $C$ -wellposedness .....	115
3.6 The case $u^{(n)}(t) = Au(t)$ .....	130
3.7 Notes .....	139

<b>Chapter 4. Analyticity and parabolicity</b>	
Summary .....	141
4.1 Analyticity .....	142
4.2 Parabolicity .....	150
4.3 The case of differential operators as coefficient operators .....	160
4.4 Entire solutions .....	167
4.5 Notes .....	176
<b>Chapter 5. Exponential growth bound and exponential stability</b>	
Summary .....	177
5.1 Exponential growth bound of the propagators .....	177
5.2 Exponential stability of solutions .....	188
5.3 Notes .....	196
<b>Chapter 6. Differentiability and norm continuity</b>	
Summary .....	199
6.1 Differentiability .....	199
6.2 Norm continuity (general case) .....	214
6.3 Norm continuity (a special case) .....	221
6.4 Operator matrices generating various semigroups .....	225
6.5 Notes .....	237
<b>Chapter 7. Almost periodicity</b>	
Summary .....	239
7.1 Incomplete second order equations .....	239
7.2 Complete second order equations .....	249
7.3 Notes .....	261
<b>Appendix</b> .....	263
A1 Fractional powers of nonnegative operators .....	263
A2 Strongly continuous semigroups and cosine functions .....	264
<b>Bibliography</b> .....	269
<b>Index</b> .....	299
<b>Symbols</b> .....	301
