

Robert F. Brown

A Topological Introduction to Nonlinear Analysis

Second Edition

Birkhäuser
Boston • Basel • Berlin

This One

5UYB-HHJ-C8JA

Contents

Preface	ix
---------------	----

Part I Fixed Point Existence Theory

1 The Topological Point of View	3
2 Ascoli–Arzela Theory	9
3 Brouwer Fixed Point Theory	19
4 Schauder Fixed Point Theory	23
5 The Forced Pendulum	29
6 Equilibrium Heat Distribution	39
7 Generalized Bernstein Theory	45

Part II Degree Theory

8 Brouwer Degree	51
9 Properties of the Brouwer Degree	55
10 Leray–Schauder Degree	63
11 Properties of the Leray–Schauder Degree	69
12 The Mawhin Operator	79
13 The Pendulum Swings Back	85

Part III Bifurcation Theory

14	A Separation Theorem	95
15	Compact Linear Operators	99
16	The Degree Calculation	111
17	The Krasnoselskii–Rabinowitz Bifurcation Theorem	119
18	Nonlinear Sturm–Liouville Theory	133
19	More Sturm–Liouville Theory	143
20	Euler Buckling	155

Part IV Appendices

A	Singular Homology	163
B	Additivity and Product Properties	169
C	Bounded Linear Transformations	175
