

SPACE—TIME— MATTER

BY

HERMANN WEYL

TRANSLATED FROM THE GERMAN BY

HENRY L. BROSE

DOVER PUBLICATIONS, INC.

INDEX

(The numbers refer to the pages)

- ABERRATION, 160, 186.
- Abscissa, 9.
- Acceleration, 115.
- Action (cf. Hamilton's Function), 210.
 - principle of, 211.
 - quantum of, 284, 285.
- Active part and future, 175.
- Addition of tensors, 43.
 - of tensor-densities, 110.
 - of vectors, 17.
- Adjustment and persistence, 308.
- Aether (as a substance), 160.
 - (in a generalised sense), 169, 311.
- Affine geometry (infinitesimal), 112.
 - (linear Euclidean), 16.
 - manifold, 102.
 - relationship of a metrical space, 135.
 - transformations, 21.
- Allowable systems, 177.
- Analysis situs, 273, 279.
- Angles, measurement of, 13, 29.
 - right, 13, 29.
- Angular momentum, 46.
 - velocity, 47.
- Associative law, 17.
- Asymptotic straight line, 77, 78.
- Atom, Bohr's, 71, 303.
- Axioms of affine geometry, 17.
 - of metrical geometry (Euclidean), 27.
 - — — (infinitesimal), 121.
- Axis of rotation, 13.
- Between*, 12.
- Bilinear form, 26.
- Biot and Savart's Law, 73.
- Bohr's model of the atom, 71, 303.
- Bolyai's geometry, 79, 80.
- CALIBRATION, 121.
 - (quodotie), 127.
- Canonical cylindrical co-ordinates, 260.
- Cartesian co-ordinate systems, 29.
- Cathode rays, 198.
- Causality, principle of, 207.
- Cayley's measure-determination, 82.
- Centrifugal forces, 222, 223.
- Charge (as a substance), 214.
 - (generally), 260, 294.
- Christoffel's 3-indices symbols, 132.
- Clocks, 7, 307.
- Co-gradient transformations, 41, 42.
- Commutative law, 17.
- Components, co-variant, and contra-variant of a displacement, 35.
 - — — of a tensor, 37 (*generally*), 103.
 - — — — (in a linear manifold), 103.
 - — — of a vector, 20.
 - — — of the affine relationship, 142.
- Conduction, 195.
- Conductivity, 76.
- Configuration, linear point, 20.
- Congruent, 11, 81.
 - transference, 140.
 - transformations, 11, 28.
- Conservation, law of, of electricity, 269, 271.
 - — of energy and momentum, 292.
- Continuity, equation of, of electricity, 161.
 - of mass, 183.
- Continuous relationship, 103, 104.
- Continuum, 84, 85.
- Continuation-hypothesis of Lorentz and Fitzgerald, 171.
 - process of, 48.
- Contra-gradient transformation, 34.
- Contra-variant tensors, 35.
 - — (generally), 103.
- Convection currents, 195.
- Co-ordinate systems, 9.
 - — Cartesian, 29.
 - — normal, 173, 313.
- Co-ordinates, curvilinear (or Gaussian), 86.
 - (generally), 9.
 - (hexaspherical), 286.
 - (in a linear manifold), 17, 28.
- Coriolis forces, 222.
- Coulomb's Law, 73.
- Co-variant tensors, 55.
 - — (generally), 103.
- Cur, 60.
- Current, conduction, 160.
 - convection, 195.
 - electric, 131.
- Curvature, direction, 126.

- Curvature, distance, 124.
 — Gaussian, 95.
 — (generally), 118.
 — of light rays in a gravitational field, 215.
 — scalar of, 134.
 — vector, 118.
 Curve, 85.
- Definite, positive*, 27.
- Density (based on the notion of substance), 103, 291.
 — (general conception), 197.
 — (of electricity and matter), 167, 214, 311.
- Dielectric, 70.
 — constant, 72.
- Differentiation of tensors and tensor-densities, 59.
- Dimensions, 19.
 — (positive and negative, of a quadratic form), 31.
- Direction-curvature, 126.
- Displacement current, 162.
 — dielectric, 70.
 — electrical, 71.
 — infinitesimal, of a point, 103.
 — of a vector, 110.
 — of space, 34.
 — towards red due to presence of great masses, 216.
- Distance (generally), 121.
 — (in Riemannian geometry), 20.
- Distortion tensor, 60.
- Distributive law, 17.
- Divergence (*div*), 60.
 — (more general), 163, 198.
- Doppler's Principle, 185.
- Earlier and later*, 7, 175.
- Einstein's Law of Gravitation, 236.
 — — — (in its modified form), 291.
- Electrical charge (as a flux of force), 254.
 — — (as a substance), 214.
 — current, 131.
 — displacement, 162.
 — intensity of field, 65, 161.
 — momentum, 208.
 — pressure, 208.
- Electricity, positive and negative, 212.
- Electromagnetic field, 61.
 — — and electrostatic units, 161.
 — — (origin in the metrics of the world), 292.
 — potential, 165.
- Electromotive force, 76.
- Electron, 213, 260.
- Electrostatic potential, 73.
- Energy (acts gravitationally), 232, 237.
 — (possesses inertia), 304.
 — (total energy of a system), 301.
- Energy density (in the electric field), 70, 167.
 — (in the magnetic field), 72.
- Energy-momentum tensor (cf. Energy-momentum), 168.
 — — (for the whole system, including gravitation), 269.
 — — (general), 199.
 — — (in the electromagnetic field), 163.
 — — (in the general theory of relativity), 309.
 — — (in physical events), 292.
 — — (kinetic and potential), 199.
 — — (of an incompressible fluid), 205.
 — — (of the electromagnetic field), 291.
 — — (of the gravitational field), 269.
 — — theorem of (in the special theory of relativity), 168.
- Energy-momentum or energy-flux, 163.
- Eotvos' experiment, 225.
- Equality of time-lengths, 7.
 — of vectors, 118.
- Ether, *vide* aether.
- Euclidean geometry, §§ 1-4.
 — group of rotations, 128.
 — manifolds, Chapter I (from the point of view of infinitesimal geometry), 119.
- Euler's equations, 51.
- FARADAY'S Law of Induction, 161, 191.
- Fermat's Principle, 244.
- Field action of electricity, 216.
 — (electromagnetic), 194.
 — energy, 166.
 — — of gravitation, 231.
 — forces (contrasted with inertial forces), 282.
 — (general conception), 68.
 — ("guiding" or gravitational), 282.
 — intensity of electrical, 65.
 — — of magnetic, 75.
 — (metrical), 100.
 — momentum, 168.
- Finite of space, 278.
- Fluid, incompressible, 262.
- Force, 38.
 — (electric), 68.
 — (field force and inertial force), 282.
 — (ponderomotive, of electrical field), 68.
 — (ponderomotive, of magnetic field), 73.
 — (ponderomotive, of electromagnetic field), 208.
 — (ponderomotive, of gravitational field), 222.
- Form, bilinear, 26.
 — linear, 22.
 — quadratic, 27.

Four-current (4-current), 165.

Four-force (4-force), 167.

Fresnel's convection co-efficient, 186.

Future, active and passive, 177.

GALILEI'S Principle of Relativity and Newton's Law of Inertia, 149.

Gaussian curvature, 95.

General principle of relativity, 227, 236.

Geodesic calibration, 127.

— co-ordinate system, 112.

— line (general), 114.

— — (in Riemann's space, 128.

— null-line, 127.

— systems of reference, 127.

Geometry, affine, 26.

— Euclidean, §§ 1-4.

— infinitesimal, 142.

— metrical, 27.

— n -dimensional, 19, 25.

— non-Euclidean (Bolyai - Lobachevsky), 79, 80.

— on a surface, 87.

— Riemann's, 84.

— spherical, 265.

Gradient, 59.

— (generalised), 106.

Gravitation, Einstein's Law of (modified form), 221.

— Einstein's Law of (general form), 225.

— Newton's Law of, 229.

Gravitational constant, 213.

— energy, 268.

— field, 240.

— mass, 225.

— potential, 243.

— radius of a great mass, 255.

— waves, § 10, 249.

Groundform, metrical (of a linear manifold), 28.

— (in general), 140.

Groups, 9.

— infinitesimal, 144.

— of rotations, 124.

— of translations, 15.

HAMILTON'S function, 209.

— principle (in the special theory of relativity), 216.

— — (according to Maxwell and Lorenz), 236.

— — (according to Mie), 209.

— — (in the general theory of relativity), 222.

Height of displacement, 158.

Hexaspherical co-ordinates, 285.

Homogeneity of space, 91.

— of the world, 155.

Homogeneous linear equations, 34.

Homologous points, 11.

Hydro-dynamics, 205, 268.

Hydro-static pressure, 205, 268.

Impulse (momentum), 44.

Independent vectors, 19.

Induction, magnetic, 75.

— law of, 161, 191.

Inertia (as property of energy), 202.

— moment of, 48.

— principle of (Galilei's and Newton's), 152.

Inertial force, 201.

— index, 30.

— law of quadratic forms, 30.

— mass, 225.

— moment, 48.

Infinitesimal displacement, 110.

— geometry, 142.

— group, 144.

— operation of a group, 142.

— rotations, 146.

Integrable, 108.

Intensity of field, 65, 161.

— quantities, 109.

Joule (heat-equivalent), 162.

Klein's model, 80.

Letter, 5.

Light, electromagnetic theory of, 164.

— ray, 183.

— — (curved in gravitational field), 245.

Line, straight (in Euclidean geometry), 12.

— — (generally), 18.

— — quadric, 114.

Line-element (in Euclidean geometry), 56.

— (generally), 103.

Linear equations,

— point configuration, 20.

— tensor, 57, 104.

— tensor-density, 105, 109.

— vector manifold, 19.

— — transformation, 21, 22.

Linearly independent, 19.

Lobachevsky's geometry, 79, 80.

Lorentz-Einstein Theorem of Relativity, 165.

— Minkowski construction, 171.

— transformation, 166.

Magnetic induction, 75.

— intensity of field, 75.

— permeability, 75.

Magnetisation, 75.

Magnetism, 74.

Magnitudes, 23.

Manifold, strictly connected, 112.

— discrete, 97.

- Manifold, metrical, 102, 121.
 Mass (as energy), 204.
 — (as a flux of force), 305.
 — inertial and gravitational, 225.
 — (producing a gravitational field), 303, 300.
 Matrix, 32.
 Matter, 66, 303, 272.
 — flux of, 188.
 Maxwell's application of stationary case to Riemann's space, 130.
 — density of action, 386.
 — stresses, 75.
 — theory (derived from the world's metrics), 285.
 — — (general case), 161.
 — — (in the light of the general theory of relativity), 222.
 — — (stationary case), 64.
 Measure, electrostatic and electromagnetic, 161.
 — relativity of, 282.
 — unit of, 40.
 Measure-index of a distance, 121.
 Measurement, 176.
 Mechanics, fundamental law of (derived from field laws), 230, 213.
 — — — — (in general theory of relativity), 222, 226.
 — — — — (in special theory of relativity), 197.
 — — — of Newton's, 44, 65.
 — of the principle of relativity, § 24.
 Metrical groundform, 28, 140.
 Metrics or metrical structure, 156.
 — — — — (general), 121, 207, 202.
 Michelson-Morley experiment, 170.
 Mie's Theory, 206.
 Minor space, 157.
 Molecular currents, 74.
 Moment, electrical, 304.
 — mechanical, 44, 200.
 — of momentum, 48.
 Momentum, 44, 200.
 — density, 168.
 — flux, 168.
 Motion (in mathematical sense), 105.
 — (under no force), 51, 229.
 Multiplication of a tensor by a number, 43.
 — of a tensor-density by a number, 109.
 — — — — by a tensor, 110.
 — of tensors, 44.
 — of a vector by a number, 17.
 Newton's Law of Gravitation, 219.
 Non-degenerate bilinear and quadratic forms, 17.
 Non-Euclidean geometry, 77.
 — plane (Beltrami's model), 38.
 — — (Klein's model), 80.
 Non-Euclidean plane (metrical ground-form of), 94.
 Non-homogeneous linear equations, 24.
 Normal calibration of Riemann's space, 124.
 — system of co-ordination, 179, 313.
 Now, 143.
 Null-lines, geodesic, 127.
 Number, 8, 39.
 Ohm's Law, 76.
 One-sided surfaces, 274.
 Order of tensors, 36.
 Orthogonal transformations, 34.
 PARALLEL, 14, 21.
 — displacement (infinitesimal, of a contra-variant vector), 112.
 — — — — co-variant vector, 115.
 — projection, 157.
 Parallelepiped, 20.
 Parallelogram, 88.
 Parallels, postulate of, 78.
 Partial integration (principle of), 110.
 Passive past and future, 175.
 Past, active and passive, 175.
 Perihelion, motion of Mercury's, 247.
 Permeability, magnetic, 75.
 Perpendicularity, 121.
 — (in general), 29.
 Persistence, 308.
 Phase, 219.
 Plane, 18.
 — (Beltrami's model), 93.
 — (in Euclidean space), 13.
 — (Klein's model), 82.
 — (metrical groundform), 94.
 — (non-Euclidean), 80.
 Planetary motion, 256.
 Polarisation, 71.
 Ponderomotive force, of the electric, magnetic and electromagnetic field, 67, 73, 194.
 — — of the gravitational field, 222, 223.
 Positive definite, 27.
 Potential, electromagnetic, 165.
 — electrostatic, 164.
 — energy-momentum tensor of, 199, 200.
 — of the gravitational field, 230.
 — retarded, 164, 165, 250.
 — vector, 70, 163.
 Poynting's vector, 163.
 Pressure, on all sides, electrical, 208.
 — — — — hydrostatic, 205, 263.
 Problem of one body, 254.
 Product, etc., vide Multiplication.
 — of a tensor and a number, 43.
 — scalar, 27.
 — vectorial, 45.

- Projection, 157.
 Propagation of electromagnetic disturbances, 164.
 — of gravitational disturbances, 251.
 — of light, 164.
 Proper-time, 178, 180, 197.
 Pythagoras' Theorem, 91, 228.

 QUADRATIC forms, 31.
 Quantities, intensity, 103.
 — magnitude, 109.
 Quantum Theory, 285, 303.

 RADIAL symmetry, 252.
 Reality, 213.
 Red, displacement towards the, 245.
 Relationship, affine, 112.
 — continuous, 108, 104.
 — metrical, 142.
 — of a manifold as a whole (conditions of), 114.
 — of the world, 273.
 Relativity of magnitude, 283.
 — of motion, 152, 282.
 — principle of (Einstein's «special»), 109.
 — — — (general), 227, 235.
 — — — Galilei's, 149.
 — theorem of (Lorentz-Einstein), 165.
 Resolution of tensors into space and time of vectors, 153, 180.
 Rest, 150.
 Rotated potential, 164, 165, 250.
 Riemann's curvature, 132.
 — geometry, 81.
 — space, 132.
 Right angle, 23, 121.
 Rotation (or curl), 60.
 — (general), 155.
 — (in geometrical sense), 13.
 — (in kinematical sense), 47.
 — relativity of, 155.
 Rotations, group of, 139, 145.

 SCALAR-DENSITY, 109.
 Scalar field, 58.
 — product, 27.
 Similar representation or transformation, 140.
 Simultaneity, 174, 185.
 Skew-symmetrical, 39, 55.
 Space (as form of phenomena), 1, 96.
 — (as projection of the world), 153, 180.
 — element, 56.
 — Euclidean, §§ 1-4.
 — like vector, 179.
 — metrical, 33, 37.
 — n -dimensional, 24.
 Special principle of relativity, 169.
 Sphere, charged, 300.
 Spherical geometry, 83, 266.
 — transformations, 296.

 Static density, 197.
 — gravitational field, § 23, 240.
 — length, 176.
 — volume, 153.
 Stationary field, 114, 240.
 — orbits in the atom, 303.
 — vectors, 114.
 Stokes' Theorem, 108.
 Stresses, elastic, 58, 60.
 — Maxwell's, 75.
 Substance, 214, 273.
 Substance-action of electricity and gravitation, 215.
 — (= mass), 300.
 Subtraction of vectors, 17.
 Sum of tensor-densities, 109.
 — — tensors, 43.
 — — vectors, 17.
 Surface, 85, 274.
 Symmetry, 26.
 Systems of reference, 177.
 — — — geodesic, 127.

 TENSOR (general), 50, 108.
 — (in linear space), 33.
 — density, 109.
 — field, 105.
 — (general), 58.
 Time, 245.
 — like vectors, 179.
 Top, «spinning», 51.
 Torque of a force, 46.
 Trace of a matrix, 49, 145.
 Transfix, 93.
 Transference, congruent, 140.
 Transformation or representation,
 affine, 21.
 — — — congruent, 11, 28.
 — — — linear-vector, 21, 22.
 — — — similar, 140.
 Translation of a point (in the geometrical sense), 10.
 — — — (in the kinematical sense), 115.
 Turning moment of a force, 46.
 Twists, 13.
 Two-sided surfaces, 274.

 Unit vectors, 104.

 VECTOR, 16, 24.
 — curvature, 125.
 — density, 109.
 — manifold, linear, 19.
 — potential, 74, 163.
 — product, 45.
 — transference, 117.
 — transformation, linear, 21, 22.
 Velocity, 105.
 — of propagation of gravitation, 251.
 — — — of light, 164.

- | | |
|--|----------------------------|
| Velocity of rotation, 47. | World (= space-time), 189. |
| Volume-element, 216. | — canal, 268. |
| | — law, 212, 273, 276. |
| Weights of tensors and tensor densities, | — line, 149. |
| 127. | — point, 149. |
| Wilson's experiment, 109. | — vectors, 165. |
