

Russell C. Walker

The Stone-Čech Compactification

Springer-Verlag
Berlin Heidelberg New York 1974

Table of Contents

Chapter 1. Development of the Stone-Ćech Compactification . . .	1
Completely Regular Spaces	4
βX and the Extension of Mappings	8
$\mathcal{I}$ -Filters and $\mathcal{I}$ -Ultrafilters	11
βX and Maximal Ideal Spaces	13
Spaces of $\mathcal{I}$ -Ultrafilters	19
Characterizations of βX	25
Generalizations of Compactness	30
F -Spaces and P -Spaces	35
Other Approaches to βX	38
Exercises	40
Chapter 2. Boolean Algebras	43
The Stone Representation Theorem	47
Two Examples	53
The Completion of a Boolean Algebra	59
Separability in Boolean Algebras	61
Exercises	67
Chapter 3. On $\beta\mathbb{N}$ and $\mathbb{N}^*$	70
The Cardinality of $\beta\mathbb{N}$	70
The Clopen Sets of $\beta\mathbb{N}$ and $\mathbb{N}^*$	73
A Characterization of $\mathbb{N}^*$	80
Types of Ultrafilters and the Non-Homogeneity of $\mathbb{N}^*$	88
Exercises	93
Chapter 4. Non-Homogeneity of Growths	95
Types of Points in X^*	97
C -Points and C^* -Points in X^*	100
P -Points in X^*	106
Remote Points in X^*	110

The Example of $\beta\mathbb{R}$	116
Exercises	117
Chapter 5. Cellularity of Growths	120
Lower Bounds for the Cellularity of X^*	120
π-Points and Uniform Ultrafilters	126
π-Points and Compactifications of $\mathbb{N}$	131
Exercises	134
Chapter 6. Mappings of βX to X^*	136
C^*-Embedding of Images	136
Retractive Spaces	138
Growths of Compactifications	141
Mappings of βD and other Extremely Disconnected Spaces	146
Exercises	156
Chapter 7. $\beta\mathbb{N}$ Revisited	160
$\mathbb{N}^* \setminus \{p\}$ is not Normal	161
An Example Concerning the Banach-Stone Theorem	164
A Point of $\mathbb{N}^*$ with ϵ Relative Types	168
Types, $\mathbb{N}^*$-Types, and P-Points	170
Minimal Types and Points with Finitely Many Relative Types	176
Exercises	185
Chapter 8. Product Theorems	187
Glicksberg's Theorem for Finite Products	188
The Product Theorem for Infinite Products	205
Assorted Product Theorems	212
The ν-Analogue: An Open Question	216
Exercises	217
Chapter 9. Local Connectedness, Continua, and X^*	220
Compactifications of Locally Connected Spaces	220
A Non-Metric Indecomposable Continuum	225
Continua as Growths	236
Exercises	242
Chapter 10. βX in Categorical Perspective	243
Categories and Functors	244
Reflective Subcategories of the Category of Hausdorff Spaces	248

Adjunctions in Reflective Subcategories	266
Perfect Mappings	273
Projectives	282
Exercises	291
Bibliography	297
Author Index	319
List of Symbols	322
Index	323
