CONTENTS

Preface	vii
I. Foliations on Manifolds	1
1.1 Definitions and examples of foliations	1
1.2 Holonomy	13
1.3 Ehresmann foliations	19
1.4 Foliations and curvature	25
II. Local Riemannian Geometry of Foliations	31
2.1 The main tensors and their invariants	31
2.2 A Riemannian almost-product structure	36
2.3 Constructions of geodesic and umbilic foliations	40
2.4 Curvature identities	48
2.5 Riemannian foliations	55
III. T -Parallel Fields and Mixed Curvature	64
3.1 Jacobi and Riccati equations	64
3.2 T -parallel vector fields and the Jacobi equation	73
3.3 L -parallel vector fields and variations of curves	77
3.4 Positive mixed curvature	79
IV. Rigidity and Splitting of Foliations	95
4.1 Foliations on space forms	96
4.2 Area and volume of a T -parallel vector field	98
4.3 Riccati and Raychaudhuri equations	116
V. Submanifolds with Generators	129
5.1 Submanifolds with generators in Riemannian spaces	129
5.2 Submanifolds with generators in space forms	137
5.3 Submanifolds with nonpositive extrinsic q -Ricci curvature	151
5.4 Ruled submanifolds with conditions on mean curvature	164
5.5 Submanifolds with spherical generators	170

VI. Decomposition of Ruled Submanifolds	175
6.1 Cylindricity of submanifolds in a Riemannian space of nonnegative curvature	176
6.2 Ruled submanifolds in CROSS and the Segre embedding	183
6.3 Ruled submanifolds in a Riemannian space of positive curvature and Segre type embeddings	192
VII. Decomposition of Parabolic Submanifolds	201
7.1 Parabolic submanifolds in CROSS	201
7.2 Parabolic submanifolds in a Riemannian space of positive curvature	211
7.3 Remarks on pseudo-Riemannian isometric immersions	215
Appendix A. Great Sphere Foliations and Manifolds	
with Curvature Bounded Above	218
A.1 Great circle foliations	218
A.2 Extremal theorem for manifolds with curvature bounded above	223
Appendix B. Submersions of Riemannian Manifolds	
with Compact Leaves	235
Appendix C. Foliations by Closed Geodesics	
with Positive Mixed Sectional Curvature	247
References	255
Index	283
