Multilevel Projection Methods for Partial Differential Equations

SOCIETY FOR INDUSTRIAL AND APPLIED MATHEMATICS
PHILADELPHIA, PENNSYLVANIA 19102

Contents

v	PREFACE
1	CHAPTER 1. Fundamentals
	1.1 Introduction
	1.2 Notation and Conventions
	1.3 Prototype Problems
	1.4 Discretization by Projections
	1.5 Realizability and Nodal Representations
	1.6 Interlevel Transfer Matrices
	1.7 Error Measures
31	CHAPTER 2. Multilevel Projection Methods
	2.1 Abstract Framework: The Multilevel Projection Method (PML)
	2.2 The Multigrid Method (MG)
	2.3 The Fast Adaptive Composite Grid Method (FAC)
	2.4 Prototype Problems
	2.5 Relaxation
	2.6 Coarse-level Realizability and Recursiveness
	2.7 Parallelization: Asynchronous FAC (AFAC)
	2.8 Other Practical Matters
	2.9 Summary
49	CHAPTER 3. Unigrid
	3.1 Basic Unigrid Scheme
	3.2 Multigrid Simulation
	3.3 FAC Simulation
	3.4 Performance Assessment
	3.5 Caveats

61	CHAPTER 4. Paradigms
	4.1 Rayleigh-Ritz 1: Parameter Estimation
	4.2 Rayleigh-Ritz 2: Transport Equations
	4.3 Galerkin 1: General Eigenvalue Problems
	4.4 Galerkin 2: Riccati Equations
	4.5 Petrov-Galerkin 1: The Finite Volume Element Method (FVE)
	4.6 Petrov-Galerkin 2: Image Reconstruction
97	CHAPTER 5. Perspectives
101	REFERENCES
103	APPENDIX A. Simple Unigrid Code
107	APPENDIX B. More Efficient Unigrid Code
111	APPENDIX C. Modification to Unigrid Code for Local Refinement
113	INDEX
