

Boris Tsirelson Wendelin Werner

Lectures on Probability Theory and Statistics

Ecole d'Été de Probabilités
de Saint-Flour XXXII - 2002

Editor: Jean Picard

Springer

Contents

Part I Boris Tsirelson: Scaling Limit, Noise, Stability

Introduction	5
1 A First Look	6
2 Abstract Nonsense of the Scaling Limit	17
3 Scaling Limit and Independence	28
4 Example: The Noise Made by a Poisson Snake	44
5 Stability	56
6 Generalizing Wiener Chaos	67
7 Example: The Brownian Web as a Black Noise	83
8 Miscellany	93
References	103
Index	105

Part II Wendelin Werner: Random Planar Curves and Schramm-Loewner Evolutions

1 Introduction	113
2 Loewner Chains	124
3 Chordal SLE	130
4 Chordal SLE and Restriction	137
5 SLE and the Brownian Frontier	143
6 Radial SLE	151
7 Some Critical Exponents for SLE	156
8 Brownian Exponents	161
9 SLE, UST and LERW	169
10 SLE and Critical Percolation	176
11 What Is Missing	185
References	190
List of Participants	197
List of Short Lectures	199
