Contents

<i>Preface</i>	v
1. Introduction	1
1.1 Introduction to Partial Differential Equations	2
1.2 Outline of Book	6
1.3 Introduction to <i>Mathematica</i>	8
1.4 Mathematical Preliminaries	10
Further Reading	26
References	26
Problems	28
2. First-Order Partial Differential Equations	35
2.1 The Method of Characteristics	36
2.2 Boundary Conditions of First-Order Equations	45
2.3 Nonlinear First Order Equations	52
2.4 The Complete Integral	60
Further Reading	63
References	64
Problems	65
3. Second-Order Partial Differential Equations	77
3.1 Equations with Constant Coefficients	79
3.2 Boundary Conditions of Second-Order Equations	84
3.3 Geometry of Cauchy Boundary Conditions	89
3.4 Hyperbolic Equations	91
	ix

3.5 Parabolic Equations	97
3.6 Elliptic Equations	101
Further Reading	107
References	107
Problems	108
4. Separation of Variables and the Sturm–Liouville Problem	119
4.1 The Method of Separation of Variables	120
4.2 Orthogonality of Functions	124
4.3 Fourier Series	126
4.4 Fourier Series Solutions of Differential Equations	133
4.5 The Sturm–Liouville Problem	143
Further Reading	146
References	147
Problems	148
5. Series Solutions of Ordinary Differential Equations	167
5.1 Singular Points of Differential Equations	168
5.2 The Method of Frobenius	171
5.3 Constructing Complementary Solutions	180
5.4 Standard Forms of Equations with Singular Points	191
Further Reading	194
References	195
Problems	196
6. Special Functions and Orthogonal Polynomials	207
6.1 Hermite Polynomials	208
6.2 Legendre Polynomials	215
6.3 Legendre Functions and Spherical Harmonics	222
6.4 Bessel Functions	226
6.5 Generating Functions	235
Further Reading	240
References	241
Problems	242
7. Transform Methods and Green's Functions	261
7.1 The Fourier Transform	262
7.2 The Laplace Transform and the Bromwich Integral	269
7.3 Fundamental Solution of the Diffusion Equation	274
7.4 Fundamental Solution of Poisson's Equation	279
7.5 Fundamental Solution of the Wave Equation	283
7.6 Green's Functions in the Presence of Boundaries: The Method of Images	286
Further Reading	293
References	293
Problems	294

8. Integral Representations	317
8.1 The Laplace Transform	318
8.2 The Euler Transform	322
8.3 Hypergeometric Functions	328
8.4 Bessel Functions	331
8.5 Hankel Functions	338
Further Reading	343
References	343
Problems	344
9. Introduction to Nonlinear Partial Differential Equations	355
9.1 Nonlinearity in Partial Differential Equations	356
9.2 The Burgers Equation—An Exact Solution	361
9.3 Elementary Soliton Solutions	366
9.4 Bäcklund Transformations	371
9.5 Nonlinear Superposition Principles	377
Further Reading	385
References	386
Problems	388
10. The Method of Inverse Scattering	403
10.1 Evolution of Eigenfunctions and Eigenvalues	405
10.2 The Inverse Scattering Transform	412
10.3 Solution of the Scattering Problem	422
10.4 Lax's Method	434
Further Reading	437
References	438
Problems	439
<i>Index</i>	453
