

Daniel W. Stroock

A Concise Introduction to the Theory of Integration

Third Edition

Birkhäuser
Boston • Basel • Berlin

Contents

<i>Preface to Third Edition</i>	ix
<i>Preface to Second Edition</i>	xi
<i>Preface to First Edition</i>	xiii
Chapter I The Classical Theory	1
1.1 Riemann Integration	1
1.2 Riemann-Stieltjes Integration	7
Chapter II Lebesgue Measure	18
2.0 The Idea	18
2.1 Existence	20
2.2 Euclidean Invariance	29
Chapter III Lebesgue Integration	33
3.1 Measure Spaces	33
3.2 Construction of Integrals	39
3.3 Convergence of Integrals	50
3.4 Lebesgue's Differentiation Theorem	62
Chapter IV Products of Measures	69
4.1 Fubini's Theorem	69
4.2 Steiner Symmetrization and the Isodiametric Inequality	75
Chapter V Changes of Variable	81
5.0 Introduction	81
5.1 Lebesgue vs. Riemann Integrals	82
5.2 Polar Coordinates	87
5.3 Jacobi's Transformation and Surface Measure	90
5.4 The Divergence Theorem	105
Chapter VI Some Basic Inequalities	115
6.1 Jensen, Minkowski, and Hölder	115
6.2 The Lebesgue Spaces	121
6.3 Convolution and Approximate Identities	132

Chapter VII Elements of Fourier Analysis	141
7.1 Hilbert Space	141
7.2 Fourier Series	149
7.3 The Fourier Transform, L^1 -theory	153
7.4 Hermite Functions	157
7.5 The Fourier Transform, L^2 -theory	165
Chapter VIII A Little Abstract Theory	171
8.1 An Existence Theorem	171
8.2 The Radon-Nikodym Theorem	183
Solution Manual	189
Notation	247
Index	250
