Contents

CHAPTER 3

Automorphic functions	1
1. Fractional linear transformations	1
2. Noneuclidean geometry	14
3. Discontinuous groups	30
4. Polygon groups	39
5. Poincaré series	52
6. The field of automorphic functions	56
7. Automorphic and algebraic functions	70
8. Algebraic curves of genus 0 and 1	76
9. Canonical polygons	83

CHAPTER 4

Abelian integrals	95
1. Reduction	95
2. Existence	102
3. The period matrix	109
4. The modular group	114
5. Canonical transformation	119
6. The theorem of Riemann and Roch	131
7. The theorem of Abel	144
8. The Jacobi inversion problem	154
9. Theta functions	158
10. The zeros of the theta function	165
11. Theta quotients	172
12. Jacobi-Abel functions	178
Cumulative index volumes I and II	191
