## PART I

### GREEK ASTRONOMY TO ARISTARCHUS OF SAMOS

| CHAPTER                                                                              | PAGES   |
|--------------------------------------------------------------------------------------|---------|
| I. SOURCES OF THE HISTORY . . . . .                                                  | 1-6     |
| II. HOMER AND HESIOD . . . . .                                                       | 7-11    |
| III. THALES . . . . .                                                                | 12-23   |
| IV. ANAXIMANDER . . . . .                                                            | 24-39   |
| V. ANAXIMENES . . . . .                                                              | 40-45   |
| VI. PYTHAGORAS . . . . .                                                             | 46-51   |
| VII. XENOPHANES . . . . .                                                            | 52-58   |
| VIII. HERACLITUS . . . . .                                                           | 59-61   |
| IX. PARMENIDES . . . . .                                                             | 62-77   |
| X. ANAXAGORAS . . . . .                                                              | 78-85   |
| XI. EMPEDOCLES . . . . .                                                             | 86-93   |
| XII. THE PYTHAGOREANS . . . . .                                                      | 94-120  |
| XIII. THE ATOMISTS, LEUCIPPUS AND DEMOCRITUS .                                       | 121-129 |
| XIV. OENOPIDES . . . . .                                                             | 130-133 |
| XV. PLATO . . . . .                                                                  | 134-189 |
| XVI. THE THEORY OF CONCENTRIC SPHERES—EUDOXUS,<br>CALLIPPUS, AND ARISTOTLE . . . . . | 190-224 |
| XVII. ARISTOTLE ( <i>continued</i> ) . . . . .                                       | 225-248 |
| XVIII. HERACLIDES OF PONTUS . . . . .                                                | 249-283 |
| XIX. GREEK MONTHS, YEARS, AND CYCLES . . . .                                         | 284-297 |

## PART II

### ARISTARCHUS ON THE SIZES AND DISTANCES OF THE SUN AND MOON

|                                                                                       |         |
|---------------------------------------------------------------------------------------|---------|
| I. ARISTARCHUS OF SAMOS . . . . .                                                     | 299-316 |
| II. THE TREATISE ON SIZES AND DISTANCES—HISTORY<br>OF THE TEXT AND EDITIONS . . . . . | 317-327 |
| III. CONTENT OF THE TREATISE . . . . .                                                | 328-336 |
| IV. LATER IMPROVEMENTS ON ARISTARCHUS'S CALCULA-<br>TIONS . . . . .                   | 337-350 |
