Contents

1

Jumping Into Java 1

- 1.1 Computers and Programs 1
- 1.2 Programs and Models 2
- 1.3 Objects, Behavior, and Classes 4
- 1.4 Our First Object: A Monitor 5
- 1.5 Sending a Message to the `System.out` Object 8
- 1.6 A Java Program 10

Java Interlude: Identifiers, Statement Order, Format, and Comments 11

- 1.7 Mechanics 15
- 1.8 Time 18
- Summary 19
- Study Aid: Terminology Review 20
- Questions for Review 21
- Further Exercises 21
- GUI Supplement: Introduction 21

2

Using Objects 23

- 2.1 Introduction 23
- 2.2 Using `PrintStream` Objects 23

- ~ **Java Interlude: References, Methods, and Messages** 24
 - 2.3** The `String` Class 26
 - 2.4** Methods, Arguments, and Return Values 29
 - 2.5** Reference Variables 30
- ~ **Java Interlude: Variables and Assignment** 33
 - 2.6** Using `String` Methods 38
- ~ **Java Interlude: More Than One Method, More Than One Message** 45
 - Summary** 49
 - Study Aid: Terminology Review** 49
 - Questions for Review** 50
 - Further Exercises** 51
 - GUI Supplement: Web Pages and HTML** 51

3

Using Classes 57

- 3.1** Introduction 57
- 3.2** Creating Objects 57
- ~ **Java Interlude: Origins of Objects** 59
 - 3.3** Disk Files 60
 - 3.4** Writing Output to Files 62
 - 3.5** Input: An Overview 66
 - 3.6** Input: The Keyboard 68
 - 3.7** Interactive Input/Output 71
 - 3.8** Input: Disk Files 74
 - 3.9** Network Computing: An Introduction 77
 - Summary** 81
 - Study Aid: Terminology Review** 81
 - Questions for Review** 82
 - Further Exercises** 83
 - GUI Supplement: Applets** 83

4**Defining Classes 89**

- 4.1 Introduction 89
- 4.2 Class Definitions 90
- 4.3 Designing Classes: Specifying an `InteractiveID` Class 96
- 4.4 Implementing the `InteractiveID` Class 100
- 4.5 Improve the Implementation but Don't Touch the Interface! 102

~ **Java Interlude: Variables, Declarations, and the `return` Statement 105**

- 4.6 Specifying a `Name` Class 109
- 4.7 Implementing the `Name` Class 113
- 4.8 State and Behavior 118
- 4.9 Outputting Objects: Revisiting the `Name` Class 119
- 4.10 Inputting Objects: Another Visit to the `Name` Class 121
- 4.11 Our First Program Revisited 125

Summary 126

Study Aid: Terminology Review 126

Questions for Review 128

Further Exercises 129

GUI Supplement: Applets, Painting, and Creating Controls 129

5**The Class Design Process; Method Implementation and Numerical Processing 141**

- 5.1 Introduction 141
- 5.2 Designing Classes—An Overview 142
- 5.3 Numeric Processing—The `int` Data Type 142
- 5.4 Collecting Tolls: An Example 143

~ **Java Interlude: Primitive Data Types, `int`, Expressions, and Operators 153**

~ **Java Interlude: `int` Methods and `int` Input 161**

- 5.5 Other Integer Types 163

- 5.6 Modeling the Numbers of Measurement 165
- Summary 170
- Study Aid: Terminology Review 171
- Questions for Review 172
- Further Exercises 172
- GUI Supplement: Drawing Text 173

6

Controlling Behavior—Conditional Execution 189

- 6.1 Introduction 189
- 6.2 Conditional Execution—The `if` Statement 190
- 6.3 Employee Payroll: An Example 190
- ~ Java Interlude: The `if` Statement 200
- 6.4 Input Methods Revisited: Testing for End of Input 206
- 6.5 Type `boolean` and Boolean-Valued Expressions 207
- 6.6 A Time Class 209
- ~ Java Interlude: `boolean`, Compound Conditionals, and Logical Operators 218
- Summary 224
- Study Aid: Terminology Review 224
- Questions for Review 225
- Further Exercises 225
- GUI Supplement 1: Responding to Controls: Event-Handling 226
- GUI Supplement 2: Bringing the Calculator to Life 232

7

Verifying Object Behavior 245

- 7.1 Introduction 245
- 7.2 Categories of Errors 247
- 7.3 Test Drivers 250
- 7.4 Automatic Testing 252

- 7.5 What to Test and How to Test It 255
- 7.6 Debugging Techniques 260
- Summary 262
- Study Aid: Terminology Review 262
- Questions for Review 263
- Further Exercises 263

8

Working with Multiple Objects 265

- 8.1 Introduction 265
- 8.2 Processing Multiple Objects 266
- 8.3 Loop Patterns 269
- 8.4 The Impact of Loops on Testing 271
- 8.5 A Radio Station's Song Library 272
- 8.6 Maintaining Multiple Values 278
- 8.7 Vector—A Simple Collection Class 290
- 8.8 Moving Through a Vector—Enumerations 281
- 8.9 Revisiting the SongLibrary Class 284

~ Java Interlude: Primitive Types and Collections; Revisiting the Wrapper Classes 286

- 8.10 An Example—Determining a Student's Relative Performance 287
- 8.11 A Set Class 292

~ Java Interlude: Class object Methods 300

- Summary 303
- Study Aid: Terminology Review 304
- Questions for Review 305
- Further Exercises 305
- GUI Supplement: List, Checkbox, and CheckboxGroup 305

9

Iteration 315

- 9.1 Introduction 315

- 9.2 Designing Loops 316
- 9.3 Another Simple Example 321
- 9.4 Revisiting the Loop Patterns of Chapter 8 326
- 9.5 Variations on the Payroll Loop 332
- 9.6 More Loop Patterns: Counters, Accumulators, and Extremes 338
- ~ **Java Interlude: The for Loop, Short Circuits, and break and continue** 345
- 9.7 A Loop Design Strategy: Refining an Imperfect Solution 349
- 9.8 The Radio Station's Play Schedule 354
- Summary 361
- Study Aid: Terminology Review 362
- Questions for Review 362
- Further Exercises 363
- GUI Supplement: Threads 363

10

Organizing Objects 379

- 10.1 Indexing 379
- 10.2 The Limitations of Enumerations 382
- 10.3 Searching 386
- 10.4 Self-Organizing Vectors 391
- ~ **Java Interlude: The Methods of Vector and Their Efficiency** 398
- 10.5 Finding the Index of an Extreme 401
- 10.6 Binary Search 403
- 10.7 Sorting 413
- 10.8 Introducing Arrays 419
- 10.9 Vectors and Arrays 422
- 10.10 Command-Line Arguments 424
- 10.11 Strings and Indices 425
- 10.12 The Game of Life: Two-Dimensional Arrays 427
- Summary 441
- Study Aid: Terminology Review 442

- Questions for Review** 442
- Further Exercises** 443
- GUI Supplement: The Game of Life Applet** 444

11

Recursion 461

- 11.1** Introduction 461
- 11.2** Example: Exponentiation 462
- 11.3** How to Design a Recursive Method 465
- 11.4** Recursive Methods: Under the Hood 469
- 11.5** Recursion with Vectors, Arrays, and Strings 474
- 11.6** Permutations 477
- 11.7** Towers of Hanoi 481
- 11.8** Recursion and Iteration 494
- Summary** 497
- Study Aid: Terminology Review** 497
- Questions for Review** 498
- Further Exercises** 498
- GUI Supplement: Towers of Hanoi Applet** 499

12

Examples 515

- 12.1** Introduction 515
- 12.2** The LOGO Turtle 515
- 12.3** Web Site Maintenance 529
- 12.4** The Game of Mancala 561
- Summary** 596
- Study Aid: Terminology Review** 596
- Questions for Review** 596
- Further Exercises** 597
- GUI Supplement: A Graphical Interface for the Game of Mancala** 597

13

🔗 Extending Class Behavior 627

- 13.1 Introduction 627
- 13.2 Extending Classes—Inheritance I 628
- 13.3 A Better BufferedReader 629
- 13.4 Adding State to the Subclass—Accessing the Superclass's State 635
- 13.5 Revisiting the `Name` Class—Adding Additional State 636

~ **Java Interlude: Inheritance** 640

- 13.6 Overriding Methods 647

~ **Java Interlude: Polymorphism** 649

- 13.7 Factoring out Common Behavior—Inheritance II 652
- 13.8 Abstract Methods and Classes 656
- 13.9 Specifying Common Behavior—Interfaces 659
- 13.10 A Generic Sorting Method 661

Summary 664

Study Aid: Terminology Review 666

Questions for Review 666

Further Exercises 667

GUI Supplement: Exploring the AWT Portion of the Java Class Hierarchy 667

GUI Supplement 2: Swing 677

14

🔗 Exceptions 689

- 14.1 Expect the Unexpected 689
- 14.2 Encountering the Unexpected 690

~ **Java Interlude: The `Exception` Class** 691

- 14.3 Handling the Unexpected 695
- 14.4 Responsibility for the Unexpected 700
- 14.5 Exceptions Are Not Always Errors 702

Summary 705

Study Aid: Terminology Review 706

Questions for Review	706
Further Exercises	706
NET Supplement: Clients and Servers	707

Appendix A: Glossary of Terms 725

Appendix B: Three Java Environments 739

Appendix C: Some of Java's Predefined Classes, Interfaces, Methods, and Constants 749

Appendix D: Exercises for Selected GUI Supplements 779

Appendix E: AWIO 783

Index 793
