

# ALGEBRAIC LOGIC

BY

**PAUL R. HALMOS**

PROFESSOR OF MATHEMATICS  
UNIVERSITY OF MICHIGAN

**CHELSEA PUBLISHING COMPANY**  
**NEW YORK**

## Contents

What is logic? . . . . .	1
1. To count or to think . . . . .	1
2. A small alphabet . . . . .	3
3. A small grammar . . . . .	4
4. A small logic . . . . .	6
5. What is truth? . . . . .	7
6. Motivation of the small language . . . . .	8
7. All mathematics . . . . .	9
Propositional calculus . . . . .	13
8. Propositional symbols . . . . .	13
9. Propositional abbreviations . . . . .	15
10. Polish notation . . . . .	17
11. Language as an algebra . . . . .	18
12. Concatenation . . . . .	18
13. Theorem schemata . . . . .	20
14. Formal proofs . . . . .	23
15. Entailment . . . . .	27
16. Logical equivalence . . . . .	29
17. Conjunction . . . . .	31
18. Algebraic identities . . . . .	35
Boolean algebra . . . . .	41
19. Equivalence classes . . . . .	41
20. Interpretations . . . . .	43
21. Consistency and Boolean algebra . . . . .	45
22. Duality and commutativity . . . . .	46

## PART THREE

## SUMMARY

VIII. GENERAL THEORY .....	243
Polyadic Boolean algebras. <i>Proceedings of the National Academy of Sciences</i> , vol. 40 (1954), pp. 296-301.	
IX. TERMS AND EQUALITY.....	251
Predicates, terms, operations, and equality in polyadic Boolean algebras. <i>Proceedings of the National Academy of Sciences</i> , vol. 42 (1956), pp. 130-136.	
X. BRIEF SUMMARY .....	261
Polyadic Boolean algebras. <i>Proceedings of the International Congress of Mathematicians, Amsterdam</i> , vol. 2 (1954), pp. 402-403.	
ADDITIONAL BIBLIOGRAPHY .....	265
INDEX .....	269
