Contents

Introduction	v
Singular Perturbations in Elasticity Theory	1
1 Stationary Elasticity Theory. Basic Equations and Boundary Conditions	3
1.1 Elastic Deformations of Three-Dimensional Solids	3
1.2 Elastic Deformations of Plates	22
1.3 Elastic Rods and Beams	32
2 Singular Perturbations in the Theory of Thin Elastic Rods	51
2.1 Preliminary Remarks, Rods and Beams with Simply Supported End Points	51
2.2 Uniform Two-Sided A Priori Estimates	52
2.3 Reduction to Regular Perturbations	64
2.4 Asymptotic Formulae for the Solutions	77
2.5 Eigenvalue Problems	85
2.6 Bifurcation Phenomena	99
2.7 Other Boundary Conditions: Clamped or Free Rods and Beams	107
2.8 Eigenvalue Problem with Mixed Boundary Conditions	113
2.9 More General Fourth Order Elliptic Singular Perturbations	126
2.10 Numerical Methods	136
2.11 Asymptotic and Numerical Approaches Combined	144
2.12 Applications to Some Other Linear and Non-Linear Problems in Elasticity Theory	155
3 Singular Perturbations in the Theory of Buckling Plates	183
3.1 Basic Equations and Boundary Conditions	183
3.2 Statement of the Problem	185
3.3 Two-Sided a Priori Estimates: Statement of the Stability Result	187
3.4 Model Problem in the Half-Plane $\mathbb{R}_+^2$	191
3.5 Model Problem in $\mathbb{R}_+^2$; Coerciveness Condition	196

3.6	Model Problem in $\mathbb{R}_+^n$; A Posteriori Estimate	205
3.7	Plate Problems in a Bounded Domain: A Priori Estimates	209
	Bibliography	221
A	General Coercive Singular Perturbations	241
A.1	Ellipticity and Coerciveness, Two-Sided a Priori Estimates	241
A.2	Reduction to Regular Perturbations	245
A.3	Asymptotically Reducing Operator	249
A.4	Eigenvalue Problem for Coercive Singular Perturbations	252
B	Travelling Waves in Shallow Water	257
B.1	Introduction and Main Results	257
B.2	Basic Equations	260
B.3	Equations for Travelling Waves	262
B.4	Reduced Equations for Travelling Waves	264
B.5	A Priori Estimates for the Stream Function	270
B.6	Rapidly Oscillating Periodic Travelling Waves	273
B.7	Slow Periodic Waves	279
B.8	Solitary Waves	283
B.9	Superposition of Slow and Highly Oscillatory Waves	286
B.10	Plane-Parallel Surface Waves as a Dynamic System	289
	Bibliography	301
C	Toeplitz Operators and the Theory of One Parameter Families of Difference Operators	305
C.1	Examples	305
C.2	Finite Difference Operators on $\mathbb{R}_h^n = h\mathbb{Z}^n$	308
	C.2.1 Coercive Boundary Value Problems for Elliptic Finite Difference Operators	310
C.3	On the Spectral Function of an Elliptic Finite Difference Operator	314
	Bibliography	317
D	Asymptotic Analysis of Non-Linear Second-Order Elliptic and Parabolic Singular Perturbations	319
D.1	Notation. Statement of the Problem	320
D.2	Stationary Problem	322
	D.2.1 General Properties of the Operators Considered	322
	D.2.2 Convergence for $\epsilon \rightarrow 0$	324
	D.2.3 The Critical Value λ_c of λ	332
D.3	Estimates for the Critical Value of λ	334
D.4	The Critical Set in the Case of the Laplacian	337

D.5 The Asymptotic Behaviour of the Solution to $\mathcal{A}_\infty^\lambda$ when $\lambda \rightarrow \infty$	341
D.6 Non-Stationary Problem	343
D.6.1 General Properties of the Operators Considered	343
D.6.2 Convergence as $t \rightarrow \infty$	344
D.6.3 Convergence for $\epsilon \downarrow 0$	345
D.6.4 Nonnegative Solutions	346
D.6.5 Special Solutions of Cauchy's Problem for the Reduced Operator ..	347
D.6.6 Short Time Asymptotics	348
D.6.7 Asymptotics for $\lambda \rightarrow \infty$	348
Bibliography	351
