

part 1

reviews on **INFINITE**
GROUPS

as printed in
MATHEMATICAL REVIEWS
1940 through 1970
volumes 1—40 inclusive

classified by
GILBERT BAUMSLAG
editor

MENTS FOR THE READER **iii**

BOOKS AND SURVEY ARTICLES **1**

- 1 Books on general group theory · 1
- 2 Collections of articles, translations, and surveys for general groups · 14
- 3 Seminars · 18
- 4 Books on various subjects related to discrete group theory · 22
- 5 Books on physical and other applications of group theory · 36

THE AXIOMS FOR GROUPS AND SOME ALGEBRAIC SYSTEMS RELATED TO THEM **43**

- 6 Books, surveys and general articles · 43
- 7 The group axioms · 49
- 8 Conditions for a semigroup to be a group · 55
- 9 The associative law; associative multiplications on groups · 57
- 10 Embedding semigroups in groups · 59
- 11 Miscellaneous topics · 66

GROUPS GIVEN BY GENERATORS AND DEFINING RELATIONS **73**

- 12 Books, surveys, general articles · 73
- 13 Subgroups of free groups · 73
- 14 Verbal subgroups of normal subgroups of free groups · 77
- 15 Lie ring methods in free groups; commutators · 79
- 16 Properties relating to automorphisms in free groups · 81
- 17 Equations in free groups · 83
- 18 Groups with free subgroups; representations of free groups by matrices · 87
- 19 Residual properties of free groups · 91
- 20 Locally free groups; miscellaneous generalizations of free groups · 92
- 21 Groups with a single defining relation · 96
- 22 Finitely presented groups · 100
- 23 Presentations of specific groups; miscellaneous presentations · 103
- 24 Calculus of presentations; relation modules · 107
- 25 Subgroup theorems; miscellaneous · 114

ALGORITHMIC AND OTHER PROBLEMS RELATING TO LOGIC **116**

- 26 Books, surveys and general articles · 116
- 27 The word problem for groups—negative solutions · 119
- 28 The word problem for groups—positive solutions · 128

CONTENTS

- 29 The conjugacy problem · 138
- 30 The occurrence and power problems · 142
- 31 The isomorphism and related algorithmic problems involving determinants of group-theoretic properties · 145
- 32 Miscellaneous algorithmic problems in groups · 149
- 33 Elementary theories; various problems relating to logic · 152
- 34 Computational problems · 156
- 35 Algorithmic problems about Thue and related algebraic systems · 164
- 36 Miscellaneous · 164

V DECOMPOSITIONS OF GROUPS AND GROUP-THEORETICAL CONSTRUCTIONS

- 37 Books, surveys and general articles · 168
- 38 Subgroups of free products · 169
- 39 Miscellaneous results about free products · 172
- 40 Representations of free products · 175
- 41 Group amalgams and generalized free products · 177
- 42 Structure of restricted direct products (direct sums) · 183
- 43 Unrestricted (complete) direct products; generalized direct sum products · 189
- 44 Wreath products and their generalizations · 191
- 45 Solvable and nilpotent products · 197
- 46 Regular, varietal, associative and other operations · 201
- 47 Generalized and unrestricted regular and related products · 208
- 48 Permutational, skew and other products · 211
- 49 Semi-direct and general products; factorizable groups · 217
- 50 Complementation and completely factorizable groups · 221
- 51 Limits; miscellaneous topics · 224

VI VARIETIES OF GROUPS

- 52 Books, surveys and general articles · 227
- 53 Calculus of varieties and general properties · 228
- 54 Varietally free groups · 233
- 55 The basis problem · 238
- 56 Varieties generated by a finite group; locally finite varieties · 240
- 57 Nilpotent and soluble varieties · 243
- 58 Laws of specific groups; varieties defined by special laws · 246

VII NILPOTENT GROUPS AND THEIR GENERALIZATIONS

- 59 Books, surveys and general articles · 249
- 60 Nilpotent groups · 250
- 61 Lie ring methods in nilpotent groups · 256
- 62 Hypercentral (ZA-) groups · 258
- 63 Locally nilpotent groups; normalizer condition · 262
- 64 Polycyclic and supersolvable groups · 266

- Solvable groups - 270
- Hyperabelian and hypercyclic groups - 278
- Locally solvable groups - 281
- Engel groups; Baer groups - 284
- Generalized solvable and nilpotent groups; local theorems - 287
- Various radicals; semi-simple groups - 292

COMMUTATOR CALCULUS, COMMUTATORS AND RELATED TOPICS 299

- Basic commutators; the collection process; commutator calculations - 299
- Lie ring methods in the commutator calculus - 301
- Engel elements and related topics - 304
- Central and other commutator series - 308
- Verbal and marginal subgroups; related topics. Stability groups (see 145) - 310
- Miscellaneous topics involving commutators - 312

LOCALLY FINITE AND PERIODIC GROUPS 315

- Books, surveys and general articles - 315
- The restricted Burnside problem - 315
- The unrestricted Burnside problem - positive solutions - 320
- The unrestricted Burnside problem - negative solutions - 323
- Various properties of locally finite groups; Frobenius groups - 326
- Sylow structure and theorems of Schur-Zassenhaus type - 330
- Schmidt's problem; groups with minimum condition - 332
- Černikov p -groups - 337
- p groups - 341

SIMPLE GROUPS 343

- Books, surveys and general articles - 343
- Calculus of classes; general properties; formations - 344
- Finitely generated groups; groups of finite rank - 350
- Groups satisfying various conditions on subgroups - 351
- Complete (radicable) groups and their generalizations - 355
- Torsion-free groups; R -groups - 358
- Hopfian and non-Hopfian groups - 360
- Groups with restricted conjugacy classes - FC -groups - 362
- Groups with finite classes of conjugate subgroups - 367
- FC' nilpotent and FC -solvable groups - 369
- Perfect and characteristically simple groups; groups with restricted factor groups - 370
- Simple groups - 371
- Residually finite, residually nilpotent and related groups - 374
- Profinite, pronilpotent and related groups - 375
- Groups with miscellaneous coverings - 380

CONTENTS

- 101 Dedekind, Hamiltonian and related groups - 384
- 102 Subgroups of permutation groups - 385
- 103 Properties of permutation groups - 388
- 104 Miscellaneous - 393

XI SYSTEMS, SERIES AND SUBGROUP LATTICES

- 105 Books, surveys and general articles - 396
- 106 Composition and other series and systems - 397
- 107 Groups with isomorphic subgroup lattices; related topics - 399
- 108 Groups whose subgroup lattices satisfy certain conditions - 405
- 109 Subsemigroup lattices - 412
- 110 Miscellaneous - 414

XII SPECIAL SUBGROUPS AND TOPICS CONNECTED TO SUBGROUPS

- 111 Normal, quasinormal and related subgroups - 419
- 112 Subnormal and related subgroups - 421
- 113 Anticenter, quasicenter and norm - 426
- 114 Hypercenter - 428
- 115 Maximal subgroups; the Frattini subgroup; generating systems - 430
- 116 Sylow subgroups, Hall subgroups and related topics - 432
- 117 Representative systems, cosets, indices of subgroups, related topics - 437
- 118 Miscellaneous - 439

XIII EQUATIONS IN GROUPS AND VARIOUS EMBEDDING THEOREMS

- 119 Solutions of equations in given groups - 441
- 120 Solutions of equations in supergroups - 442
- 121 Embedding theorems - 445

XIV ORDERED, PARTIALLY ORDERED AND LATTICE ORDERED GROUPS

- 122 Books and surveys - 448
- 123 Miscellaneous and general articles on ordered groups - 451
- 124 Orderability and completion of orderings - 457
- 125 Miscellaneous and general articles on partially ordered groups - 461
- 126 Decompositions, topological notions and substructure of partially ordered groups - 466
- 127 Miscellaneous and general articles on lattice ordered groups - 469
- 128 Representations and decompositions of lattice ordered groups - 474
- 129 Lattice ordered groups of order-preserving automorphisms; related topics - 478
- 130 Ideals and related topics in lattice ordered groups - 481
- 131 Topological notions in lattice ordered groups - 486
- 132 Ordered abelian groups - 488
- 133 Partially ordered abelian groups - 495
- 134 Lattice ordered abelian groups - 500
- 135 Miscellaneous generalizations - 509

GROUP RINGS AND GROUP ALGEBRAS	515
Properties of group rings and group algebras · 515	
Radicals and semi-simplicity · 520	
Units, idempotents and zero-divisors · 523	
Dimension subgroups, augmentation ideals and related topics · 524	
Groups with representations of bounded degree · 527	
Embedding of group rings in division rings and related topics · 528	
Subgroups of rings and division rings · 531	
MORPHISMS AND MAPPINGS	538
Books, surveys and general articles · 538	
Isomorphism theorems · 538	
Stability groups · 539	
Outer and other automorphisms of general groups · 547	
Groups which have automorphisms satisfying various conditions · 548	
Various classes of groups and their automorphisms groups · 551	
The holomorph · 558	
Endomorphisms · 560	
Semi-automorphisms, paramorphisms, related topics · 563	
Automorphisms of related algebraic systems · 565	
Miscellaneous · 568	
HOMOLOGY AND COHOMOLOGY OF GROUPS	569
Books and survey articles · 569	
Extension theory · 578	
Extensions of particular groups; splitting groups · 585	
Topics connected to extensions · 586	
Homology and cohomology of group extensions · 590	
General theory of homology and cohomology groups · 594	
Groups satisfying homological conditions; ends · 603	
Eilenberg-Mac Lane complexes · 606	
Homology of special classes of groups · 607	
Miscellaneous · 612	
ABELIAN GROUPS	616
Books, surveys, seminars, and general articles · 616	

CONTENTS

XVIII-A THE BASIS THEOREM AND VARIOUS COMBINATORIAL AND NUMBER-THEORETIC PROPERTIES

- 165 Complexes, factorization (Hajos' theorem) and various set-theoretic results - 622
- 166 Linear equations, linear dependence and related topics - 628
- 167 Miscellaneous results connected to field theory, geometry, etc. - 630
- 168 Properties related to elements; generating systems - 634
- 169 The basis theorem - 637
- 170 Miscellaneous abelian groups - 638

XVIII-B TORSION GROUPS, PRIMARY GROUPS AND GENERALIZED PRIMARY GROUPS

- 171 Ulm invariants; direct sums of cyclic and countable groups - 641
- 172 p -groups satisfying conditions on height - 646
- 173 Structure of p -groups - 647
- 174 Complete and generalized p -groups; the p -adic topology - 652

XVIII-C SUBGROUPS OF ABELIAN GROUPS

- 175 Basic and p -basic subgroups; related topics - 658
- 176 Pure subgroups - 662
- 177 High and neat subgroups - 665
- 178 Divisible subgroups and divisibility; maximal subgroups - 667
- 179 The torsion-subgroup and splitting - 668
- 180 Miscellaneous - 672

XVIII-D TORSION-FREE AND MIXED ABELIAN GROUPS

- 181 Torsion-free groups of finite rank - 675
- 182 Direct sums of groups of finite rank - 679
- 183 Direct products; slender groups - 681
- 184 Various decompositions - 685
- 185 Direct summands - 687
- 186 Indecomposable groups - 689
- 187 Various torsion-free groups - 691
- 188 Mixed abelian groups - 692

XVIII-E AUTOMORPHISMS AND ENDOMORPHISMS OF ABELIAN GROUPS

- 189 Homomorphisms of primary groups - 695
- 190 Automorphism groups of primary groups - 696
- 191 Endomorphisms of torsion-free groups - 698
- 192 Endomorphisms of primary groups - 700
- 193 Miscellaneous topics concerning endomorphisms and automorphisms - 702
- 194 Endomorphisms and endomorphism rings satisfying various conditions - 704
- 195 Miscellaneous - 708

[F] HOMOLOGICAL METHODS	712
General results - 712	
Tensor products; Tor - 712	
Ext and related topics - 714	
Hom - 720	
Relative homological algebra - 721	
[G] SOME UNRELATED TOPICS IN THE THEORY OF ABELIAN GROUPS	724
Various constructions - 724	
Additive groups of rings - 725	
Duality in abelian groups - 728	
Categorical notions - 729	
Topologies; algebraically compact groups - 731	
Various classes - 735	
SOME UNRELATED TOPICS	737
Groups with operators - 737	
Means in groups; mappings defined on groups - 742	
Categorical ideas - 743	
Miscellaneous - 745	
DISCRETE LINEAR GROUPS	749
Books and surveys - 749	
Properties of various invertible matrices - 749	
Commutators in linear groups - 751	
Nilpotent linear groups - 753	
Solvable linear groups - 756	
Locally nilpotent and Engel linear groups - 760	
Periodic linear groups; Sylow structure - 763	
Monomial groups - 767	
Discrete groups admitting faithful matrix representations - 769	
Various discrete group-theoretic properties of linear groups - 770	
Homomorphisms of linear groups - 774	
THE CLASSICAL GROUPS	775
Books, surveys and general articles - 775	
Properties of the general linear group - 782	
Various subgroups of linear groups - 785	
Normal and congruence subgroups in modular and two-dimensional linear groups - 788	
Normal and congruence subgroups in n -dimensional linear groups - 797	
Generators for various linear groups - 805	
Presentations; various relations - 809	

CONTENTS

- 229 Automorphisms of general linear and unimodular groups · 813
- 230 Automorphisms and isomorphisms of classical groups · 816
- 231 Unitary groups · 824
- 232 Orthogonal groups · 828
- 233 Projective groups · 838
- 234 Symplectic groups · 842
- 235 Simple groups of exceptional type; primitive groups · 845
- 236 Infinite dimensional linear groups · 849
- 237 Whitehead groups · 850
- 238 Miscellaneous · 855

XXII REPRESENTATION THEORY OF DISCRETE GROUPS

- 239 Books and survey articles · 858
- 240 Complete reducibility · 867
- 241 Representations of general linear groups · 867
- 242 Representations of the orthogonal groups · 869
- 243 Representations of the rotation groups · 870
- 244 Representations of the unitary group; unitary representations · 871
- 245 Representations of the Lorentz, symplectic and other groups · 874
- 246 Representations of various classes of discrete groups · 876
- 247 Representations of various space groups · 878
- 248 Spin representations · 881
- 249 Induced representations · 884
- 250 Tensors, invariants, S -functions and related topics · 886

XXIII GROUPS OF KNOTS, BRAIDS AND LINKS

- 251 Books and survey articles · 891
- 252 Alexander matrices; miscellaneous invariants; presentations · 893
- 253 Algebraic structure of general knot groups and links · 900
- 254 Algebraic structure of alternating knots and links · 904
- 255 Topological results with algebraic consequences · 906
- 256 Braids, links and related topics · 911

XXIV GROUPS CONNECTED TO GEOMETRY, TOPOLOGY AND ANALYSIS

- 257 Books and survey articles · 917
- 258 Fundamental groups of surfaces, Fuchsian and related discontinuous groups · 935
- 259 Fundamental groups of manifolds · 945
- 260 Crystallographic groups · 951
- 261 Symmetry groups · 956
- 262 Collineation groups · 959
- 263 Groups in geometry · 962
- 264 Groups of homeomorphisms · 969
