

INTRODUCTION TO LINEAR ALGEBRA

Marvin Marcus

Professor of Computer Science
University of California, Santa Barbara

Henryk Minc

Professor of Mathematics
University of California, Santa Barbara

DOVER PUBLICATIONS, INC., NEW YORK

Contents

Preface	vii
----------------	-----

1

<i>Vector Spaces and Linear Transformations</i>	1
--	---

1. Vector spaces	1
2. Linear transformations	14
3. Inner product	28
4. Matrix representations	45
5. Inverses	64

2

<i>Linear Equations and Determinants</i>	77
---	----

1. Rank of a matrix	77
2. Operations on matrices	87
3. Linear equations	99
	ix

4. Permutations	108
5. Introduction to determinants	119
6. Properties of determinants	128

3

Characteristic Roots	143
-----------------------------	-----

1. Characteristic roots and characteristic vectors	143
2. Schur's theorem	155
3. Normal matrices	165
4. Hermitian matrices	176
5. Matrix inequalities	192

Answers and Solutions	210
------------------------------	-----

Index	257
--------------	-----
