

Numerical Methods for Fluid Dynamics V

Edited by

K. W. MORTON

*Computing Laboratory
University of Oxford*

and

M. J. BAINES

*Department of Mathematics
University of Reading*

CLARENDON PRESS • OXFORD

1995

Table of Contents

List of Contributors	xiii
Invited Papers	
New Developments in Numerical Weather Prediction <i>T. Davies and J.C.R. Hunt</i>	1
A Perspective of Computational Fluid Dynamics Research at NASA <i>J.L. Thomas</i>	19
Modelling Turbulent Transport in Complex Flows: Physical Challenges, Numerical Implementation and Predictive Performance <i>M.A. Leschziner and F-S. Lien</i>	37
An Assessment of the Cell Vertex Method <i>K.W. Morton</i>	55
Computational Fluid Dynamics in Airplane Design - An Industrial Point of View <i>S. Rill and K. Becker</i>	73
Developing an Integrated Atmospheric Environment Modelling System <i>A. Staniforth, J. Côté, S. Gravel, A. Méthot, A. Patoine and M. Roch</i>	95
Heterogeneous Domain Decomposition for Compressible Flows <i>A. Quarteroni and L. Stolic</i>	113
Multigrid Techniques for Unstructured Mesh Methods in CFD <i>D.J. Mauriphs</i>	129
A Streamline Based Approach to the Adaptation of Unstructured Grids for Viscous Flow Simulation <i>M. Marchant and N.P. Weatherill</i>	147

An Upwind Scheme for Magnetohydrodynamics <i>K.G. Powell, P.L. Roe, R.S. Myong, T. Gombosi and D. de Zeeuw</i>	163
Multidimensional Upwinding: Preparing the Future of Computational Methods for Compressible Flows <i>H. Deconinck and H. Paillère</i>	181
Unstructured Mesh CFD Analysis Tools for Design <i>B. Stoufflet</i>	197
A Method to obtain von Neumann Stability Conditions for the Convection-Diffusion Equation <i>P. Wesseling</i>	211

The Bill Morton Prize

A Semi-staggered Residual Distribution Method for 2-D and 3-D Steady Inviscid Compressible Flows <i>L. Catalano</i>	225
Multidimensional Characteristic Galerkin Methods <i>S. Oskamp</i>	233
Highly Accurate Solution of the Stationary Convection-Diffusion Equation <i>A.J. Perella</i>	243
Conservative Interface Algorithm for Overlapped Structured/Structured, Structured/Unstructured Grids <i>Z.J. Wang</i>	253
An Automotive Application on Unstructured Grids <i>M. Wierse</i>	263

Contributed Papers

Multi-resolution Analysis on Unstructured Mesh : Application to CFD <i>R. Abgrall</i>	271
An Adaptive Finite Element Method for Turbulent Flow Simulations <i>F. Arnoux Guisse, O. Bonnin and L. Léal De Sousa</i>	277

Preconditioners for High Speed Flows in Aerospace Engineering <i>K. J. Badcock, X. Xu, L. Dubuc and B.E. Richards</i>	287
Discontinuous Finite Element High Order Accurate Numerical Solution of the Compressible Navier-Stokes Equations <i>F. Bassi and S. Rebay</i>	295
A Temporal Refinement Algorithm for Unstructured Mesh Methods <i>P. Batten, C. Lambert, E.F. Toro, R. Saunders and D.M. Causon</i>	303
An Adaptive CFD Solver for Time-Dependent Environmental Flow Problems <i>M. Berzins, P.H. Gaskell, A. Sleigh, W. Speares, A. Tomlin and J.M. Ware</i>	311
High-Lift Navier-Stokes Computations on Unstructured Grids using a Differential Reynolds Stress Model <i>F. J.-J. Cantariti and L.J. Johnston</i>	319
An Adaptive Finite Element Method for the Compressible Navier-Stokes Equations <i>P. Capon and P.K. Jimack</i>	327
A Krylov Preconditioner used Across the Time <i>R. Choquet</i>	335
Conservative Difference Scheme for Boussinesq Model of Surface Waves <i>G.I. Christov</i>	343
Modelling Natural Ventilation using Computation Fluid Dynamics <i>M. Cook, K. Lomas, A. Howarth and M. Crane</i>	351
An Efficient Relaxation Method for a Centred Navier-Stokes Solver <i>G. Corre, K. Khalfallah and A. Lerat</i>	359
An Efficient Cell Vertex Method for Unstructured Tetrahedral Grids <i>P.I. Crumpton</i>	369

A High-order Iterative Implicit-explicit Hybrid Scheme for 2-D Hydrodynamics <i>W. Dai and P.R. Woodward</i>	377
Interaction Laws and Domain Decomposition <i>B.F.A. de Boer and A.E.P. Veldman</i>	385
Tracking the development of Vortex Flow Structures using Vortex Particle-in-Cell Methods <i>D.J. Doorly and C.H. Liu</i>	391
An Adapted Newton Method for the Turbulent $k - \epsilon$ Equations <i>M. Drežler and J.S. Rollett</i>	399
Simulation of Gas-particle Flow by Lattice Gas Methods <i>O. Filippova and D. Hänel</i>	407
Modelization of Instabilities for Polymerization Fronts <i>M. Garbey, A. Taïk and V. Volpert</i>	415
Dynamic Solid/Fluid Interaction using a Navier-Stokes Method for Deforming Grids <i>J. Hoffren</i>	423
Multidimensional Upwinding and Grid Adaptation <i>M.E. Hubbard and M.J. Baines</i>	431
Unstructured Grid Generation and Flow Adaptation for External Aerodynamic Flows <i>A.R. Jahangirian and L.J. Johnston</i>	439
Computation of Nearly Shockless Transonic Flows <i>A.G. Kuz'min and S.I. Livanskaya</i>	447
High Resolution of the 2-D Navier-Stokes Equations by the Interpolating Matrix Method <i>M. Louaked, L. Hanich and K.D. Nguyen</i>	457
Adaptive Unstructured Grid Solutions of Hypersonic Viscous Flows <i>P.R.M. Lyra, O. Hassan and K. Morgan</i>	465
Reliable Error Control for Adaptive Computations of the Compressible Euler Equations <i>J. Mackenzie and E. Süli</i>	473

Development of an Implicit Finite Volume Scheme for the Computation of Unsteady Flow Fields on Unstructured Moving Grids <i>A. Meister</i>	481
Performance of Eddy-viscosity Models for a Flow with Periodic Pressure Gradient <i>Y. Miyake, K. Tsujimoto and Y. Kawanishi</i>	489
Evaluation of the WAF Method for Kinematic and Dynamic Atmospheric Modelling Problems <i>N. Nikiforakis and E.F. Toro</i>	497
A TVD Flow Algorithm for FAME <i>S.H. Onslow and D.A. Peshkin</i>	507
Projection Decomposition Method with a Well-conditioned Basis for the Generalised Stokes Problem <i>E.E. Ovtchinnikov</i>	515
Numerical Computations of Stratified Flow over Three-Dimensional Obstacles <i>M.F. Paisley and I.P. Castro</i>	523
A 3-D Unstructured Multigrid Navier-Stokes Solver <i>J. Peiró and A.I. Sayma</i>	533
Minimum Residual Methods for the Navier-Stokes Equations: Indefiniteness vs Asymmetry <i>A. Ramage, B. Fischer, D.J. Silvester and A.J. Wathen</i>	541
Improved Accuracy and Effectiveness for Navier-Stokes Solvers on Unstructured Grids <i>G.-H. Rezzoth and S. Wittig</i>	549
Solving a Hyperbolic Two-phase Flow Model with Flow-dependent Slip Relation <i>J.E. Romate and W.J. Meiring</i>	557
Development and Use of an Advanced Numerical Model using the Volume of Fluid Method for the Design of Coastal Structures <i>Z.A. Sabeur, W. Roberts and A.J. Cooper</i>	565
A Combined Geometric Approach for Solving the Navier-Stokes Equations on Dynamic Grids <i>J. Slater</i>	575

Optimal Recovery Based on Radial Basis Functions in Finite Volume Approximations for Hyperbolic Conservation Laws <i>T. Sonar</i>	583
Navier-Stokes Solution of Compressible Fluid Flows using Advanced Turbulence Models and Unstructured Grids <i>L. Stolarski</i>	591
Viscous Inviscid Interaction Techniques Using Unstructured Meshes <i>J. Szmelter and A. Pagano</i>	599
Sensitivity Derivatives for Non-smooth or Noisy Objective Functions in Fluid Design Problems <i>M. Valorani and A. Dadone</i>	605
Hybrid Fourier-Multigrid Pressure Solution for Navier-Stokes Simulations <i>P.R. Voke and Z. Yang</i>	615
Fluctuation Splitting Schemes for the Euler Equations on Quadrilateral Grids <i>E. van der Weide and H. Deconinck</i>	623
