Contents

Preface to the Classics Edition	ix
Preface	xi
To the Reader	xiii
Chapter 1. The Nonlinear Programming Problem, Preliminary Concepts, and Notation	1
1. <i>The nonlinear programming problem</i>	1
2. <i>Sets and symbols</i>	3
3. <i>Vectors</i>	6
4. <i>Matrices</i>	8
5. <i>Mappings and functions</i>	11
6. <i>Notation</i>	13
Chapter 2. Linear Inequalities and Theorems of the Alternative	16
1. <i>Introduction</i>	16
2. <i>The optimality criteria of linear programming: An application of Farkas' theorem</i>	18
3. <i>Existence theorems for linear systems</i>	21
4. <i>Theorems of the alternative</i>	27
Chapter 3. Convex Sets in R^n	38
1. <i>Convex sets and their properties</i>	38
2. <i>Separation theorems for convex sets</i>	46
Chapter 4. Convex and Concave Functions	54
1. <i>Definitions and basic properties</i>	55
2. <i>Some fundamental theorems for convex functions</i>	63
Chapter 5. Saddlepoint Optimality Criteria of Nonlinear Programming Without Differentiability	69
1. <i>The minimization and saddlepoint problems</i>	70
2. <i>Some basic results for minimization and local minimization problems</i>	72
3. <i>Sufficient optimality criteria</i>	74
4. <i>Necessary optimality criteria</i>	76

Chapter 6. Differentiable Convex and Concave Functions	83
1. <i>Differentiable convex and concave functions</i>	83
2. <i>Differentiable strictly convex and concave functions</i>	87
3. <i>Twice-differentiable convex and concave functions</i>	88
4. <i>Twice-differentiable strictly convex and concave functions</i>	90
Chapter 7. Optimality Criteria in Nonlinear Programming with Differentiability	92
1. <i>The minimization problems and the Fritz John and Kuhn-Tucker stationary-point problems</i>	93
2. <i>Sufficient optimality criteria</i>	96
3. <i>Necessary optimality criteria</i>	97
Chapter 8. Duality in Nonlinear Programming	113
1. <i>Duality in nonlinear programming</i>	114
2. <i>Duality in quadratic programming</i>	123
3. <i>Duality in linear programming</i>	126
Chapter 9. Generalizations of Convex Functions: Quasiconvex, Strictly Quasiconvex, and Pseudoconvex Functions	131
1. <i>Quasiconvex and quasiconcave functions</i>	131
2. <i>Strictly quasiconvex and strictly quasiconcave functions</i>	136
3. <i>Pseudoconvex and pseudoconcave functions</i>	140
4. <i>Summary of properties and relations between quasiconvex, strictly quasiconvex, pseudoconvex, convex, and strictly convex functions</i>	145
5. <i>Warning</i>	147
6. <i>Problems</i>	148
Chapter 10. Optimality and Duality for Generalized Convex and Concave Functions	151
1. <i>Sufficient optimality criteria</i>	151
2. <i>Necessary optimality criteria</i>	153
3. <i>Duality</i>	157

Chapter 11. Optimality and Duality in the Presence of Nonlinear Equality Constraints	161
1. <i>Sufficient optimality criteria</i>	162
2. <i>"Minimum principle" necessary optimality criteria: X^* not open</i>	162
3. <i>Fritz John and Kuhn-Tucker stationary-point necessary optimality criteria: X^* open</i>	170
4. <i>Duality with nonlinear equality constraints</i>	174
Appendix A. Vectors and Matrices	177
1. <i>Vectors</i>	177
2. <i>Matrices</i>	179
Appendix B. Résumé of Some Topological Properties of R^n	182
1. <i>Open and closed sets</i>	182
2. <i>Sequences and bounds</i>	185
3. <i>Compact sets in R^n</i>	188
Appendix C. Continuous and Semicontinuous Functions, Minima and Infima	191
1. <i>Continuous and semicontinuous functions</i>	191
2. <i>Infimum (supremum) and minimum (maximum) of a set of real numbers</i>	195
3. <i>Infimum (supremum) and minimum (maximum) of a numerical function</i>	196
4. <i>Existence of a minimum and a maximum of a numerical function</i>	198
Appendix D. Differentiable Functions, Mean-value and Implicit Function Theorems	200
1. <i>Differentiable and twice-differentiable functions</i>	200
2. <i>Mean-value theorem and Taylor's theorem</i>	204
3. <i>Implicit function theorem</i>	204
Bibliography	205
Name Index	215
Subject Index	217
