Contents

Preface, vii

Introduction to Mathematica, xiii

Chapter 1: Introduction, 1

1.1. Notation and Definitions, 1

1.2. Initial and Boundary Conditions, 3

1.3. Classification of Second Order Equations, 4

1.4. Some Known Equations, 7

1.5. Superposition Principle, 17

1.6. Exercises, 19

Chapter 2: Method of Characteristics, 22

First Order Equations, 22

2.1. Linear Equations with Constant Coefficients, 22

2.2. Linear Equations with Variable Coefficients, 28

2.3. First Order Quasi-linear Equations, 33

2.4. First Order Nonlinear Equations, 38

2.5. Geometrical Considerations, 46

2.6. Some Theorem on Characteristics, 47

Second Order Equations, 49

2.7. Linear and Quasi-linear Equations, 49

2.8. Exercises, 56

Chapter 3: Linear Equations with Constant Coefficients, 63

- 3.1. Inverse Operators, 63
- 3.2. Homogeneous Equations, 72
- 3.3. Nonhomogeneous Equations, 74
- 3.4. Exercises, 79

Chapter 4: Orthogonal Expansions, 82

- 4.1. Orthogonality, 82
- 4.2. Orthogonal Polynomials, 85
- 4.3. Series of Orthogonal Functions, 88
- 4.4. Trigonometric Fourier Series, 90
- 4.5. Eigenfunction Expansions, 103
- 4.6. Bessel Functions, 106
- 4.7. Exercises, 110

Chapter 5: Separation of Variables, 117

- 5.1. Introduction, 117
- 5.2. Hyperbolic Equation, 118
- 5.3. Parabolic Equation, 125
- 5.4. Elliptic Equation, 132
- 5.5. Cylindrical Coordinates, 142
- 5.6. Spherical Coordinates, 144
- 5.7. Nonhomogeneous Problems, 146
- 5.8. Exercises, 152

Chapter 6: Integral Transforms, 160

- Laplace Transforms, 162
- 6.1. Notation, 162
- 6.2. Basic Laplace Transforms, 164
- 6.3. Inversion Theorem, 183
- 6.4. Exercises, 189
- Fourier Transforms, 195
- 6.5. Fourier Integral Theorems, 195
- 6.6. Properties of Fourier Transforms, 196
- 6.7. Fourier Sine and Cosine Transforms, 204
- 6.8. Finite Fourier Transforms, 210
- 6.9. Exercises, 213

Chapter 7: Green's Functions, 217

- 7.1. Definitions, 217
- 7.2. Parabolic Equations, 231
- 7.3. Elliptic Equations, 238
- 7.4. Hyperbolic Equations, 244

7.5. Applications, 249

7.6. Exercises, 252

Chapter 8: Weighted Residual Methods, 266

8.1. Line Integrals, 267

8.2. Variational Notation, 270

8.3. Multiple Integrals, 273

8.4. Weak Variational Formulation, 274

8.5. Galerkin Method, 279

8.6. Rayleigh–Ritz Method, 283

8.7. Choice of Test Functions, 287

8.8. Transient Problems, 292

8.9. Other Methods, 295

8.10. Exercises, 296

Chapter 9: Perturbation Methods, 305

9.1. Taylor Series Expansions, 306

9.2. Successive Approximations, 309

9.3. Boundary Perturbations, 311

9.4. Exercises, 314

Chapter 10: Finite Differences, 321

10.1. Finite Difference Schemes, 321

10.2. First Order Equations, 325

10.3. Second Order Equations, 328

10.4. Exercises, 343

Appendix A: Green's Identities, 350

A.1. Green's Identities, 350

A.2. Exercises, 352

Appendix B: Tables of Transform Pairs, 354

Appendix C: Glossary of Mathematica Functions, 361

Appendix D: Mathematica Packages and Notebooks, 368

Bibliography, 369

Index, 373
